Product Recap

CrowdStrike, Inc. [Private Offer Only]

CrowdStrike, Inc. [Private Offer Only]

Recap

CrowdStrike, Inc. [Private Offer Only] offers a comprehensive cybersecurity platform designed to protect organizations through advanced threat detection and real-time response capabilities.

Focused on security, CrowdStrike, Inc. [Private Offer Only] provides industry-leading detection technologies and a comprehensive threat intelligence system. Its focus on a cloud-native approach allows for rapid deployment and efficient resource management, catering to the demands of dynamic environments. Tailored for expert users, the platform addresses sophisticated cybersecurity challenges while minimizing overhead.

What are the key features?

- **Cloud-Native Architecture:** Enables scalability and quick deployment without heavy infrastructure demands.
- **Advanced Threat Detection:** Uses artificial intelligence to identify and neutralize threats swiftly.
- **Endpoint Security:** Provides thorough protection of endpoints to safeguard sensitive data and operations.
- **Threat Intelligence:** Delivers real-time updates on potential threats with actionable insights.
- **Incident Response:** Facilitates immediate response actions to mitigate impact and ensure business continuity.

What are the benefits and ROI?

- **Reduced Downtime:** Ensures swift threat mitigation, minimizing business disruption.
- **Cost Efficiency:** Cloud-based platform reduces the need for extensive hardware investment.
- **Enhanced Security Posture:** Strengthens defenses against evolving cyber threats, protecting assets.
- **Scalable Solutions:** Adapts to the growth and changes in enterprise operations.

CrowdStrike, Inc. [Private Offer Only] finds applications across industries like finance, healthcare, and retail, where sensitive data protection is critical. Its quick adaptation to industry regulations and demands makes it a preferred choice for businesses needing robust and compliant cybersecurity measures.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“CrowdStrike, Inc. [Private Offer Only] is the core of the EDR endpoint detection response in the market right now and it still is.”

Michael Woodson

CISO / Chief Cybersecurity Strategist at Onyx Spectrum Technology

“As a customer, what I appreciate most about the product is that it has already proven its worth because it was able to safeguard us against a clear cyberattack.”

Khushru_Mistry

Chief Technology Officer at GM Modular

“The risk rating gives a better view than Idera Discovery, with more information regarding the account, a severity-based risk rating, and breach types, which really helps us in formulating the IAM strategy.”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

“As a customer, what I really appreciate about CrowdStrike, Inc. [Private Offer Only] is that it works effectively, blocking all ransomware and all software that users are trying to install that is not approved, working very well as an antivirus, and we also have the SOC of CrowdStrike, Inc. [Private Offer Only] team that helps us.”

Eitan Yaacovi

System Administrator at BlueGen Water

What users had to say about valuable features:

“We use EDR right now from CrowdStrike, and those are my favorite features that stand out.

Real-time threat intelligence in Falcon does help with our security.

Falcon Endpoint Protection helps to enhance incident response.

Behavioral analytics with the help of Falcon does help to reduce false positives in my case..”

Khushru_Mistry

Chief Technology Officer at GM Modular

“As a customer, what I really appreciate about CrowdStrike, Inc. [Private Offer Only] is that it works effectively. It blocks all ransomware and all software that users are trying to install that is not approved. It works very well as an antivirus. We also have the SOC of CrowdStrike, Inc. [Private Offer Only] team that helps us.

“CrowdStrike, Inc. [Private Offer Only] improves my incident response, and I see benefits. The improvement I see for endpoint protection is that the behavior is very good and the response is very quick. It does the work and blocks all the things that I do not need to run in my network..”

Eitan Yaacovi

System Administrator at BlueGen Water

“CrowdStrike, Inc. [Private Offer Only] is the core of the EDR endpoint detection response in the market right now and it still is. The combination of AI Defense moving in that direction and them incorporating artificial intelligence is significant. Overall, when I speak to customers, CrowdStrike, Inc. [Private Offer Only] is my core versus others. Although they have some issues with too much built-in functionality, they are going to have to streamline because of artificial intelligence, but I think they are going to refine that in their next deployment.

“Beyond just the threat intelligence, the Falcon app was upgraded to Falcon because of the SOC in that ES solution. The biggest aspect for Falcon from an e-discovery perspective is retention issues for that in terms of investigation and bringing Falcon in for a breach. The upgrade was at the MBTA for a breach issue with Keolis, which was my last experience of using Falcon for that purpose..”

Michael Woodson

CISO / Chief Cybersecurity Strategist at Onyx Spectrum Technology

[Read full review](#) 

“I think the risk rating that comes up for each account in CrowdStrike is my favorite part. It pretty much gives you attack pathways for that account, showing how that account could be compromised. That is something that is really good, and it is a really good platform.

My impression of real-time threat intelligence in CrowdStrike is positive.

I would say AI in CrowdStrike's Falcon is efficient for identifying potential threats, but we have a policy in our company that has turned off all AI across platforms. We are building agents, but only for internal purposes. There is nothing external happening. Obviously, with tools CrowdStrike will pick up what the threats are. If there are AI agents involved, hopefully it will pick it up. I think the way agentic AI is progressing, I think it is going to be very difficult.

Falcon's behavioral analytics does help to reduce false positives in my case.

I won't be able to quantify by how much because I only look at the identity protection module, as that is my day-to-day role. I don't look at Falcon or any other option there, so I wouldn't be able to say anything on that.

I am relying frequently on threat hunting tools that Falcon provides.

I won't be able to provide examples or specific metrics as I don't work on that; it is a different team..”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

[Read full review](#) 

Other Solutions Considered

“I think the biggest difference I see between Idera and CrowdStrike is that CrowdStrike updates its threat modules pretty much on a daily basis. Idera does not. There are a lot of problems with their module discovery..”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

[Read full review](#) 

“We chose CrowdStrike, Inc. [Private Offer Only] because we had a demo and it looked very compliant to our needs. CrowdStrike, Inc. [Private Offer Only] dealers in Israel support our company and we went for it..”

Eitan Yaacovi

System Administrator at BlueGen Water

[Read full review](#) 

“CrowdStrike is quite advanced already because I've looked at other products also, and I don't find their functionalities as advanced as CrowdStrike.

I'm talking about SentinelOne, which we looked at quite extensively before we decided to go with CrowdStrike.

Products such as SentinelOne and other vendors do lack some functionality that CrowdStrike has..”

Khushru_Mistry

Chief Technology Officer at GM Modular

ROI

Real user quotes about their ROI:

“We have already seen a return on investment.

When we implemented CrowdStrike, about two months after that, which was two years back, we had a cyberattack, and CrowdStrike with OverWatch was able to cancel that attack for us.

ROI was already achieved within the first year of implementation..”

Khushru_Mistry

Chief Technology Officer at GM Modular

[Read full review](#) 

“CrowdStrike does provide value for money. However, Idera is pretty expensive. For basic vaulting and other features, Idera is okay, but I think they have a lot to improve upon.

Identifying any threat, flagging any unauthorized behavior or lateral movement, and privilege abuse are examples of value for money in CrowdStrike. CyberArk does have a dashboard that says these accounts are high risk, but it doesn't actually give alerts CrowdStrike provides..”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

Use Case

“My major use case for using CrowdStrike, Inc. [Private Offer Only] is EDR. I have a different use case that I now have for CrowdStrike, Inc. [Private Offer Only] compared to ESET..”

Eitan Yaacovi

System Administrator at BlueGen Water

[Read full review](#) 

“The solution is moving in that direction. One of the things I appreciate about this is that it is not a closed environment. When you look at organizations like Secureworks and Rapid7, they are trying to lock things down. The versatility and agility of Falcon solution provides a better angle in terms of endpoint detection response and endpoint security.

“Improving user behavior analytics is what I am focusing on. That is core. Understanding what users are doing, how they are doing it, what is anticipated, being very reactive and zeroing in on zero days, and being able to knock it down quickly is where I am looking for them to focus..”

Michael Woodson

CISO / Chief Cybersecurity Strategist at Onyx Spectrum Technology

[Read full review](#) 

“My major use case for CrowdStrike is endpoint security.

On the analytics side of it, my impression of analytics in CrowdStrike is that we are utilizing the product for basic analytics, which we provide, and are not using anything more than that.

I am not working with the threat hunting tools of Falcon at this moment.

We are not very familiar with the threat hunting tools at this moment, so I cannot comment on that..”

Khushru_Mistry

Chief Technology Officer at GM Modular

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“I think deployment and installation of CrowdStrike are not that difficult. You just have to install all agents across the servers. I wasn't involved in the implementation, but from what I heard, it wasn't a long process. However, the PAM one takes a long time.

I don't think the most difficult part in CrowdStrike deployment is that complex. The rollout is pretty straightforward. I think it is about one or two months before it is kicking..”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

[Read full review](#) 

Customer Service and Support

“CrowdStrike, Inc. [Private Offer Only] technical support is good and helpful. If I have to rate support from one to ten points, I would say eight or nine..”

Eitan Yaacovi

System Administrator at BlueGen Water

[Read full review](#) 

“We have direct support from CrowdStrike, and I do have a positive impression of technical support.

I think they deserve anything between eight and nine for the support, where 10 is the best..”

Khushru_Mistry

Chief Technology Officer at GM Modular

[Read full review](#) 

Other Advice

“I am the customer when it comes to CrowdStrike. It is on cloud. We have agents across all our servers, but the main portal is on cloud. We have not hosted on-premises, but it does communicate with the cloud. My final rating for CrowdStrike, if we summarize everything discussed, is 10 out of 10. About seven years ago, I started my career in this business, working in this domain with security tools..”

VishnuRamachandra

Security Engineer at a consultancy with 1-10 employees

[Read full review](#) 

“I have not used every feature myself. My team has used it in part to augment other tools. There are other tools that have come out on the market that do a better job than what CrowdStrike, Inc. [Private Offer Only] can do in certain areas, but the Falcon ecosystem itself, both from a reactive and proactive perspective, has benefited the company. However, you cannot be a master of everything and a master of none, so you have to be careful. That is what I worry about them.

“I am an end user and have been an end user for a long time. I have attended their conference a long time ago. Watching them, I believe that before everybody wants to get into the market with the opportunity of being better, I am looking for consistency. I tell people to look for someone who has good technical support and good response in terms of incident response when you do have an incident. That is where Falcon comes in. They have certainly served us well in the past and in a couple of incidents that I have been involved in with Falcon. I think that it is a great product as far as EDR goes, and I think it is going to many places. My overall review rating for this solution is 9.5 out of 10..”

Michael Woodson

CISO / Chief Cybersecurity Strategist at Onyx Spectrum Technology

[Read full review](#) 

“I am not currently working with other tools such as ATP or email security from ESET in particular. Today, I work as a customer and I am currently focused on CrowdStrike, Inc. [Private Offer Only]. My general experience with CrowdStrike, Inc. [Private Offer Only] is okay. I am not using CrowdStrike, Inc. [Private Offer Only] [Falcon](#) Real-time Threat Intelligence feature yet. We are considering the use of AI in [Falcon](#) and CrowdStrike, Inc. [Private Offer Only], and we are checking the options with CrowdStrike, Inc. [Private Offer Only] and other options. Regarding behavioral analytics and also analytics, these things you need to speak with my manager. These analytics sometimes cause false positives in general, and sometimes they reduce false positives. Regarding threat hunting, I do not frequently rely on Falcon threat hunting tools as it is not applicable for me. I have not been dealing with similar tools from the market as a comparison to CrowdStrike, Inc. [Private Offer Only]. I have not purchased anything from [AWS Marketplace](#). My review rating for CrowdStrike, Inc. [Private Offer Only] is ten out of ten..”

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
