Planview Portfolios

Planview Portfolios Recap

Planview Portfolios empowers executives, finance, and portfolio leaders by enhancing strategic investments, improving market responsiveness, and connecting strategy and execution for optimal visibility.

Planview Portfolios offers comprehensive strategic and project portfolio management to organizations. Automating and scaling these processes, it enhances speed-to-value, aligns strategic objectives with execution, and connects business and technology planning for optimal funding and resource capacity. Users gain end-to-end visibility, track progress, and improve decision-making by utilizing integrated financial and capacity planning.

What key features does Planview Portfolios offer?

- **Strategic Alignment:** Aligns objectives and OKRs with execution to ensure strategic goals are met.
- **End-to-End Visibility:** Tracks performance across the organization to support timely decision-making.
- **Dynamic Planning and Funding:** Utilizes scenario modeling for flexible strategic investment funding.
- **Flexible Capacity Planning:** Balances programs and staffing levels against available capacity.
- **Connected Technology Strategy:** Aligns technology investments with strategic digital initiatives.
- **Adaptive Program Management:** Manages dependencies, risk, and progress through integrated planning.

What benefits can users find in reviews of Planview Portfolios?

- **Workflow Efficiency:** Enhances efficiency by minimizing bottlenecks and optimizing execution.
- **Improved Decision-Making:** Provides comprehensive insights for better informed strategic decisions.
- **Financial Insights:** Offers detailed financial tracking across projects for greater transparency.
- **Organizational Agility:** Increases productivity and adaptability through a unified platform.

Planview Portfolios is implemented across projects in industries requiring strategic planning, resource allocation, and financial tracking. Organizations manage project lifecycle and integration with ERP systems on a centralized platform, utilizing customizable workflows and reporting tools to enhance efficiency and streamline team processes.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“Planview Portfolios helped me generate \$90 million in annual revenue through better resource allocation and accurate billing.”

Monabi Kingsley

Project Manager at 3M

“Planview Portfolios has positively impacted my organization since we started using this tool as a project management solution.”

Jackson Vince

System Engineer at BNY

“Planview Portfolios helps us manage both investment and execution risk while also ensuring optimal value realization in my organization.”

Collins Martin

Customer Service Representative at Roche

“Planview Portfolios has been the perfect project management tool for me to manage the entire project life cycle from a centralized source, ensuring controlling, tracking, and delivering projects on time within an agreed budget and time frame.”

Steven Jeffrey

Project Manager at AT&T

“I love Planview Portfolios because it has better integration with reporting and other systems compared to the alternatives I had before.”

Jiber Voyeur

Project Manager at AT&T

“By using Planview Portfolios, we have saved considerable time and improved our organization by delivering projects to our clients on time and within a good health margin and required budget, hence saving time and cost.”

Anastasia Suzan

Financial Analyst at Shell

“Planview Portfolios offers us a single source of truth and enables a faster, more reliable decision-making tool.”

Dwayne John

Project Lead at Wells Fargo

What users had to say about valuable features:

“The best features Planview Portfolios offers in my opinion include good integration with the financial area, good capacity planning, purchasing, and billing. There is comprehensive monitoring of the project from start to finish, strict control of hours worked, full control over cost and margins, and correct and accurate billing. The integration of financial and project data in a single solution helps us to deliver projects on time within the agreed budget and with healthy margins.

“It provides company-wide consistency thanks to the central source of data and a DMS system with centralized documentation to facilitate its search and indexing..”

Steven Jeffrey

Project Manager at AT&T

“I can provide a quick specific example of how I have used Planview Portfolios to manage a project from start to finish; it fits perfectly with increased efficiency and productivity. It has performance reports in real time. It also helps with the automation and digitization of our processes, which saves a lot of time. Good integration with the financial area, good capacity planning, purchasing, and billing.

“Planview Portfolios has positively impacted my organization by improving our time management by 20% and reducing the sending of internal emails by more than 10%.

“I appreciate how Planview Portfolios handles reporting and analytics; the reports and real-time analytics help to make data-driven decisions easily.

“Planview Portfolios handles resource management and capacity planning effectively. We are able to allocate the resources accordingly..”

Collins Martin

Customer Service Representative at Roche

[Read full review](#) 

“Planview Portfolios offers several valuable features that stand out in my experience. The workflows and lifecycles perform exceptionally well, and Planview's support is very proactive and effective. Integration with Power BI has significantly increased the scope in terms of reporting, and the financial management capabilities are excellent. System uptime and availability are outstanding because it is cloud hosted, and resource management is also excellent. The ability to configure the system to our company needs is remarkable.

The integration with Power BI has improved my reporting significantly, as I have found ease of reporting across all functionality using standard reports or creating custom reports with Power BI has been invaluable.

User administration is simple and efficient, and tracking projects from start to finish is excellent.

Planview Portfolios has positively impacted my organization since we started using this tool as a project management solution. Everything has progressed well. We have been able to save considerable time, and we are able to finish projects from start to finish within given timelines. Being able to see and manage all projects in a single location has been positive. The reporting frequency available via OData Power BI has been excellent, allowing us to identify bottlenecks promptly, and improved CAPEX reporting and pipeline visibility are outstanding..”

Jackson Vince

System Engineer at BNY

[Read full review](#) 

The best features Planview Portfolios offers include financial management, system uptime, and cloud-hosted availability. Customer support is very strong. Resource management and the ability to configure the tool to our company needs through customization are valuable.

I also appreciate the workflows and life cycles in Planview Portfolios, which perform well. Planview support is responsive and effective. Integration with Power BI has significantly increased the scope of reporting where we gain insights to make data-driven decisions easily.

“Regarding the features of Planview Portfolios, user administration is very simple, especially because of the user-friendly and intuitive interface.

“Planview Portfolios has been a great tool, especially when dealing with large projects, serving as one source of truth for our projects, particularly financial projects, and providing a single source of truth for resource capacity.

“Visibility into hidden work and project prioritization with Planview Portfolios has been outstanding. Our Power BI reporting functionality with portfolios and visibility to resource managers in supply and demand provides great analytics, which gives us insights and has enabled us to improve our decision-making by fifty percent. .”

Brian Chege

Business Development Manager at Walmart

[Read full review](#) 

“The best features Planview Portfolios offers include managing approvals through lifecycles, custom screens, and scripted dialogues, which allow access to data only to certain roles, thereby creating data limitation. We have not really started using this, but I appreciate how it will connect with Projectplace and AgilePlace. Additionally, it is extremely flexible with reporting and dashboards, offers robust business case functionality, and provides comprehensive financial data.

“These features help my team day-to-day through the robust system performance, comprehensive resource management capabilities, and visibility enhancement. The visibility ensures that users can track progress, identify bottlenecks, and make informed decisions to optimize workflow efficiency. The system stability and reliability contribute to a seamless user experience, enabling all users to focus on their tasks without disruptions. The comprehensive set of features empowers users to allocate resources strategically, analyze costs accurately, and align project timelines with available resources seamlessly.

“Planview Portfolios has positively impacted my organization by allowing me to save time. Through the CIO, approvals are no longer sent through email; they are done in the tool. There are more timely reviews and approvals, thanks to the email notifications. Additionally, there has been accurate budgeting, the ability to complete more project work within a given short timeframe, and the ability to take additional projects as resources allow..”

Dwayne John

Project Lead at Wells Fargo

[Read full review](#) 

“Planview Portfolios offers great features such as capacity monitoring, task breakouts, portfolio groups, life cycles, document storage, the ability to create simple or complex life cycles when needed, viewing a portfolio of data at once for an approval group view, and resource management expansion over the years which has allowed more valuable data to be gathered.

“I find myself relying heavily on the product because it has already solved for getting project data into the tool and identifying who is managing those projects. It has also helped to align those efforts to company leadership strategies. User administration is easy and flexibility in the project life cycle workflows is excellent.

“Planview Portfolios has positively impacted my organization with faster project prioritization and decision making, as well as improved resource and team utilization. There is visibility into hidden work, Power BI reporting functionality with portfolios, and visibility for resource managers in supply and demand.

“We save time while making decisions because we are able to gain more data, enabling data-driven decision-making to be very fast. Being able to see and manage all projects in a single location has been very positive, and the reporting frequency available via OData Power BI has also been positive.

“By using Planview Portfolios, we have saved considerable time and improved our organization by delivering projects to our clients on time and within a good health margin and required budget, hence saving time and cost. We have also improved our teamwork and collaboration. In my opinion, it is very time-saving and has added more to our team, especially when dealing with complex projects, enabling us to complete them on time..”

Anastasia Suzan

Financial Analyst at Shell

[Read full review](#) 

Other Solutions Considered

“I previously used Asana. I switched from Asana to Planview Portfolios because Asana is significantly more costly compared to Planview Portfolios and has some complicated features. The support was somewhat lagging and not as proactive compared to Planview Portfolios support..”

Jackson Vince

System Engineer at BNY

[Read full review](#) 

“I wasn't part of the team. I joined in 2010, and all the discussions and evaluations happened in 2009. All I know is that our company went in and looked at all the other products that were available at that time, and then they decided that Planview would be a better solution. It has been one of the very good decisions the company has made. We've been using it for close to 11 years..”

Verified user

PM Systems Analyst at a insurance company with 5,001-10,000 employees

[Read full review](#) 

“I believe prior to me joining the team, they'd also looked at Clarity. I wasn't part of that initial review, but I understand that Clarity was one of the other options that they looked at. I am not too sure why they decided to go with Enterprise One. The cost might've been a part of it. It could also have been because of a previous relationship with leadership and being familiar with using Enterprise One. At the time, because we were using Planview PPM Pro or Innotas, the relationship was already established. So, we were able to grow with that relationship..”

Musunga Kabwe

Senior Analyst - Technology at LPL Financial

[Read full review](#) 

“Before Planview Portfolios, I used Jira Software.

“I decided to switch from Jira Software to Planview Portfolios because Planview Portfolios is much easier to use, and it is also very cost-effective. It is a great project management tool with detailed schedules and dependencies, which is why we decided to switch..”

Jiber Voyeur

Project Manager at AT&T

[Read full review](#) 

“We went through an RFI and RFP process before going to market. We specified our requirements. We went through a series of presentations from vendors to determine who could meet our needs. And we looked at five, and we narrowed it down to three: KeyedIn, Daptive, and Planview. The process we went through there made it clear that it didn't really matter which tool you chose; what mattered was whether or not you felt the implementation process was going to go well. In addition, we compared user feedback to how well the user would interact with the tool. Against those two key criteria during the implementation process, Planview outperformed the others at the time. Based on user feedback on the UI and usability, Planview came out on top..”

Mark Hillman

Global Head of Portfolio Management at a wholesaler/distributor with 1,001-5,000 employees

[Read full review](#) 

“I previously used ServiceNow IT Business Management.

“I switched from ServiceNow IT Business Management to Planview Portfolios because while ServiceNow offers a great platform to manage applications from a programmatic and tactical vantage point, Planview takes it up a level, allowing strategic teams like enterprise architecture and PMO to view the whole landscape and make long-term decisions, which is far better than the previous tool we were using. Planview also has more tools than most modern EA teams will probably ever need, and it takes time to see the value; however, once the value starts to emerge, the possibilities are limitless..”

Anastasia Suzan

Financial Analyst at Shell

[Read full review](#) 

ROI

Real user quotes about their ROI:

“I have seen a return on investment with increased visibility and transparency of work being done. We have been able to offboard from some other tools and consolidate our efforts within the Planview suite of applications, saving money and time..”

Jackson Vince

System Engineer at BNY

[Read full review](#) 

“We weren't looking at this as purely a return on the investment project. The return is generated by the projects themselves, allowing us to deliver the projects more efficiently. It's difficult to quantify the improved performance of our project delivery. .”

Mark Hillman

Global Head of Portfolio Management at a wholesaler/distributor with 1,001-5,000 employees

[Read full review](#) 

“I have seen a return on investment because it improved visibility of the entire change portfolio across the bank and across my organization, and improved our ability to connect strategy back to work, making critical business decisions easily. It also centralizes executive-level program information to generate executive reporting..”

Jiber Voyeur

Project Manager at AT&T

[Read full review](#) 

“I have seen a return on investment as it helps my organization to optimize project resources and allocation and track progress. Planview Portfolios supports collaboration across teams and departments, hence increasing collaboration. I also love the ability to provide visibility and transparency across an organization; it allows us to create custom reports and dashboards for easy data analysis, hence making data-driven decisions easily..”

Steven Jeffrey

Project Manager at AT&T

[Read full review](#) 

“I have seen a return on investment; I am able to deliver the project on time and within the best cost timeframe. Management of invoices and services based on billing milestones has been great. Centralized project-related transaction documents, resources, and activities in one place enhance visibility. Reports and real-time analytics enhance real-time data-driven decision making..”

Collins Martin

Customer Service Representative at Roche

[Read full review](#) 

“I have seen a return on investment with Planview Portfolios, allowing for better resource allocation, which increases revenue and productivity. Resource organizations have indicated that they are spending a significantly longer period of time doing their monthly nominations. Planview Portfolios has enabled me to have a better financial workflow, and I am able to make data-driven decisions easily. Additionally, I can utilize built-in collaboration features such as virtual whiteboarding, brainstorming, Kanban boards, and notifications to keep the team aligned. It also delivers a set of shared metrics focused on customer value, such as speed and quality, to achieve business results while being able to roll up objectives and key results in the system where work gets done to ensure strategy informs execution and vice versa..”

Monabi Kingsley

Project Manager at 3M

[Read full review](#) 

Use Case

“My main use case for Planview Portfolios is that it has the best and most effective project management tool to manage the entire project life cycle from a centralized source. This ensures controlling, tracking and delivering projects on time within the agreed budget and with healthy margins..”

Collins Martin

Customer Service Representative at Roche

[Read full review](#) 

“Planview Portfolios has been the perfect project management tool for me to manage the entire project life cycle from a centralized source, ensuring controlling, tracking, and delivering projects on time within an agreed budget and time frame. It helps me optimize my project portfolio in my organization by prioritizing projects, allocating resources, and tracking progress.

“Planview Portfolios is highly customizable software that enables users to create custom fields, workflows, and reports. It fits perfectly with increased efficiency and productivity. It has performance reports in real time, where it enables us to make data-driven decisions. It also helps the automation and digitization of our processes, hence saving a lot of time and cost..”

Steven Jeffrey

Project Manager at AT&T

[Read full review](#) 

I have used Planview Portfolios for a long time, even in my previous organization, and in my current organization, this is my seventh year.

Planview Portfolios is very efficient and can be treated as a one-stop solution for project management. I appreciate the functionality to manage portfolios, manage projects, and the ability to customize life cycle workflows with a simple or complex approval process. The ease of reporting across all functionalities using standard reports or creating custom reports with Power BI tools is excellent. I have also used AgilePlace, and the Project Place user interface is performing well. I am excited about the hub where we can integrate all applications, which will be a milestone for Planview.

“We have also used Planview Portfolios to track financials, forecast and actuals on all our strategic investments over one thousand one hundred million dollars in annual spend, capacity and resource management, as well as the CTM enterprise architecture product. .”

Brian Chege

Business Development Manager at Walmart

[Read full review](#) 

“Planview Portfolios serves as our main tool to track development efforts for new products during their entire life cycle and to centralize all the steps and requirements for easy access of the team members who execute the process while also providing good data to monitor process health. The primary positive use is to provide our team members a unified experience instead of jumping through multiple tools and access requests.

“It has allowed us to work with teams, stakeholders, and project managers to identify where issues may lie with staffing and what potential tradeoffs may be required. Resource managers are able to manage and schedule their resources with ease. Resources are also able to review their schedules to see what expectations and schedules are upcoming.

“We are also using Planview Portfolios for project management, capacity, demand planning, intake, and financial reporting..”

Anastasia Suzan

Financial Analyst at Shell

[Read full review](#) 

“My main use case for Planview Portfolios is that it provides clear visibility into our work and resources, allowing for better organization and decision-making processes. This has also enhanced visibility, which ensures that our users can easily track progress, identify bottlenecks, and make informed decisions to optimize workflow efficiency.

“A specific example of how I use Planview Portfolios in my daily work is that we use it throughout the year to support strategic planning, prioritization, financial planning, and project management processes. The main problem we were looking to solve was having multiple sources of project management and related business case data, such as financial data. Planview Portfolios offers us a single source of truth and enables a faster, more reliable decision-making tool.

“I also appreciate the ability to see the business objectives and the support work activity end-to-end, including financials in regard to my main use case for Planview Portfolios..”

Dwayne John

Project Lead at Wells Fargo

[Read full review](#) 

“Planview Portfolios is my main tool for project management because it is very efficient and serves as a comprehensive solution. I appreciate the functionality to manage portfolios, manage projects, and the ability to customize lifecycle workflows with simple or complex approval processes. The ease of reporting across all functionality using standard reports or creating custom reports with powerful BI tools is also beneficial. I have used AgilePlace and ProjectPlace, and I find that this user interface performs exceptionally well. I am excited about The Hub where we can integrate all applications, which will be a milestone in Planview Portfolios.

I can provide a specific example of how I use Planview Portfolios in my daily work. We use it to track financials through forecast and actuals on all of our strategic investments where we had over \$100 million in annual spend, capacity and resource management, as well as the CTM enterprise architectural product.

Additionally, we are able to integrate it with ServiceNow and are planning to integrate it with Workday and other tools to enhance our project capabilities in the future..”

Jackson Vince

System Engineer at BNY

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“It was pretty straightforward. It sort of takes you through the step-by-step setup, so you cannot really go wrong. The tool itself guides you to the next step..”

Paulina Van Manan

[Read full review](#) 

Supervisor ITSP EPMO at a energy/utilities company with 10,001+ employees

“My experience with pricing, setup cost, and licensing reveals that the cost is a bit not affordable for a small organization, but for medium and large enterprises, I would say it is very cost-effective and affordable..”

Steven Jeffrey

[Read full review](#) 

Project Manager at AT&T

“The initial setup was straightforward. We took a very quick approach to delivery. It was simple from a Planview standpoint. The questions and approach they used worked well for us. There are no concerns about the initial implementation process. Aside from us being clear on our requirements, the tool itself is fine..”

Mark Hillman

[Read full review](#) 

Global Head of Portfolio Management at a wholesaler/distributor with 1,001-5,000 employees

“I would say that we have had some issues. This might just be more of a tractor supply issue, but we've kind of had to almost backtrack a lot of how it was originally set up. This is because the people from Tractor Supply who were there when it set up left four months in, so it was set up a little off, to begin with..”

Verified user

[Read full review](#) 

IT Project Analyst at Tractor Supply Company

“The initial setup was just a little complex. I rate the initial setup a seven out of ten. Deploying the solution took two weeks. While deploying the solution, we had two instances, one for the IT team and one for the business team. And we had to connect the two and explain things to the team. Only two people were needed to deploy the solution, me and another person..”

EduardoMaya

Project Office Manager at Hoteles City Express

[Read full review](#) 

“It was straightforward because we had great support from Planview. They do provide consultants who work with you and walk hand in hand with you in terms of setting it up. Maybe the complex nature is just the way that the tool is designed. I know they've made improvements to it, but at the time, the interface wasn't very user-friendly. So, we knew we had to do a lot of handholding and training, but the implementation was very straightforward.

The whole project exercise, from the initial inception of the idea to the actual implementation or just the actual deployment going live, took about seven months. So, it was about a seven-month project from sitting down to gather requirements to full deployment and getting users onboarded, etc. Because it was a cloud deployment, it was very seamless.

The implementation strategy was just going through meeting with stakeholders and understanding the requirements. We initially rolled it out to a sandbox environment, and we did some user acceptance testing in there for about a month or so. We rolled out all the features and full capability after about a month of the UAT from our sandbox and copying over that information into another sandbox environment. We had created a parallel environment. So, we had two environments for us. One that we actually had rolled out, and one that was a cut-over environment, just in case something went wrong with the full deployment..”

Musunga Kabwe

Senior Analyst - Technology at LPL Financial

Other Advice

“My advice for others looking into using Planview Portfolios is that it is a unique tool that provides everything a work team needs to organize their activities. I personally use it for project planning, collaborating with a team, and customizing reports. Planview Portfolios is the best tool for organizations to do multiple works.

“If you want to organize your projects by priority and progress, this platform is for you. It helps you visualize directly what you still need to finish and how to improve. It also helps to improve the relationship between collaborators and to work as a team. However, it could improve in the sense of giving more dynamism and ease of use to its platform while remaining very easy to use for everyone. I would rate this product an 8 out of 10..”

Steven Jeffrey

Project Manager at AT&T

[Read full review](#) 

“My advice for others looking into using Planview Portfolios is that if you are planning to do robust project, program, and portfolio management with integration with other critical tools within the organization, Planview products are the best suited for this kind of work. Additionally, Planview product teams work with customers such as us to implement and improve features requested by users quickly and efficiently. This makes Planview the recommended application for project management and other needs.

“I want to highlight that our project teams now have a better view of their project's health and rely on the system to perform their tasks effectively. I would rate this product a nine out of ten..”

Dwayne John

Project Lead at Wells Fargo

[Read full review](#) 

“The advice I would give to others looking into using Planview Portfolios is that it probably is the best tool for both [PPM](#) and [APM](#) capabilities on the market today. It is well-suited for companies who are ready and able to commit, meaning total buy-in from the entire organization. It is also very cost-effective and easy to use for both users who are technically proficient and those who are non-technical.

Planview Portfolios is also an excellent tool for tracking projects that follow traditional methodology with a defined beginning and end. Some challenges exist in leveraging the tool for agile and persistent teams, where multiple projects are being delivered on very short time cycles that do not align with how funding is approved..”

Jackson Vince

System Engineer at BNY

[Read full review](#) 

Every interaction with Planview Portfolios has been positive. They truly care about the success of our use in the tool and our company and try everything in their power to be successful.

Planview Portfolios has increased our ability to monitor and guide processes, process health, and compliance automatically without manual intervention. It has also provided a central platform that fits different use cases for different teams while keeping all data interconnected.

“My advice for others looking into using Planview Portfolios is that it is a great tool, well suited for complex processes involving many users where a process is robust and somewhat stable. Also, when there is availability to have dedicated tool support, it excels, especially when working on large projects and on tight time frames and budgets, making it a highly recommendable tool. I rate Planview Portfolios a nine out of ten. .”

Brian Chege

Business Development Manager at Walmart

[Read full review](#) 

“I rate Planview Portfolios nine out of ten according to my experience.

“The reason I chose a nine out of ten is because Planview has the perfect project management tool to manage the entire project life cycle from a centralized source, ensuring controlling, tracking, and delivering projects on time with good health margins and within the agreed budget to our clients.

“I would rate the customer support nine out of ten.

“My advice to others looking into using Planview Portfolios is that it is a great tool, probably the best tool for both project management and [APM](#) capabilities on the market right now. It is well-suited for companies who are ready and able to commit, which means total buy-in from the entire organization. I also think it is a decent tool. I gave this review an overall rating of nine out of ten..”

Anastasia Suzan

Financial Analyst at Shell

[Read full review](#) 

“Out of those features, I find myself relying on company-wide consistency thanks to a central source of data, enabling visibility. The DMS system centralized documentation to facilitate its search and indexing has been great.

“Planview Portfolios helps me to optimize my project portfolio in my organization by prioritizing projects, allocating resources, and tracking the progress. It is very highly customizable software that enables users to create their own custom fields, workflows, and reports.

“Collaboration, customization, and integration are great features.

“My advice to others looking into using Planview Portfolios is that it fits perfectly with increased efficiency and productivity. It has performance reports in real time. It also helps with the automation and digitization of our processes. This makes it a good project management tool.

“Planview Portfolios helps us manage both investment and execution risk while also ensuring optimal value realization in my organization. It is a very good tool and an excellent option for tracking projects that follow traditional methodology and have a defined beginning and end. I would rate this product an 8 out of 10..”
