Product Recap

Simplilearn for Business

Simplilearn for Business Recap

Simplilearn Learning Hub+ offers your workforce an annual pass with unlimited access to 700+ live and interactive classes each month. It covers AI and other digital skills, including industry certifications. Our catalog includes 550+ learning solutions across various skills such as GenAI, AI, data science, cybersecurity, software engineering, cloud, project management, and more.

The platform is designed to drive impactful digital skilling in any organization at scale, with live, hands-on learning by experts. Our live classes boast an industry-leading completion rate of 80%, and our learners experience high retention and practical application of new skills. Transform your organization's digital skilling initiatives with unlimited live and interactive learning.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“We have seen better collaboration across the team, as learners are now more aligned on best practices and modern tools.”

Rasheed Shaik

Associate Lead Product Engineer at a tech vendor with 5,001-10,000 employees

“The Simplilearn for Business concepts I learned, including some advanced Python concepts and AWS concepts, helped me to bridge QA automation into cloud-related topics and allowed me to apply automation at full scale in cloud-based projects.”

Srimugundhan Sp

QA Lead at Trane Technologies

“Simplilearn for Business has positively impacted our organization by aiding us in onboarding the Infinity product, which is something Temenos offers, as we moved from being onboarded on Azure to utilizing AWS, allowing us to achieve industry-standard certifications that provide credibility on our skills.”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

- ✓ “Since I started using Simplilearn for Business, I personally upgraded my skill set in AI and ML, and by attending various courses, certifications, and master programs, I upskilled myself and gained so much knowledge through the live sessions, which has had a big impact in the organization and significantly improved my productivity.”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

- ✓ “My experience with the AWS certification course through Simplilearn for Business helped me significantly with my day-to-day growth, day-to-day work, and career development to build scalable applications and deploy them over the cloud.”

Tushar_Gupta

Software Engineer at a tech vendor with 10,001+ employees

- ✓ “The best features that Simplilearn for Business offers are that if we complete one certification course, they offer multiple courses, which makes it possible for us to learn in our free time and also helps in completing other certifications.”

S Subasrikavya

Senior engineer at Bosch Global software technology and solutions

“Simplilearn for Business has played a significant role in strengthening our organization's skill ecosystem.”

Akshaychangdeo Selokar

Lead Engineer at Bosch

What users had to say about valuable features:

“The best features that Simplilearn for Business offers include industry-recognized certification and a structured learning path with live class instructor-led training. There are more than five hundred easy to learn and accessible courses available.

“My experience with live classes has been positive, as there is one-to-one interaction which keeps you focused in the class, making it easier to learn than recorded classes. The structured learning path helps me stay on track.

“One excellent feature is that if you stop your course during learning and then revisit it, the course will resume at the same point where you left off. The platform also keeps all recorded sessions in the library and displays all certificates in one window..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#)

“One of the best features that Simplilearn for Business offers is its straightforward usability, where you just log in and access the courses available to you, with detailed courses and course materials available post-watching the course videos, making it a very straightforward and clear-cut way to learn and understand things.

“Simplilearn for Business has positively impacted our organization by aiding us in onboarding the Infinity product, which is something Temenos offers, as we moved from being onboarded on Azure to utilizing AWS, allowing us to achieve industry-standard certifications that provide credibility on our skills..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

“The best features Simplilearn for Business offers include an industry-aligned curriculum designed with real-world job requirements in mind, expert-led training by experienced industry professionals, hands-on projects and labs, well-structured learning paths, latest and up-to-date content, flexible self-paced learning, real-world case studies, recognized certifications, strong learning support and community interaction, and a career-focused approach.

“The most effective feature of Simplilearn for Business is the high-impact reviews and leaderboard ranking. It shows real value, not generic praise. It signals that skills are directly applied at work. It resonates with the professional rigor of the platform itself.

“Key features of Simplilearn for Business include industry-aligned curriculum and expert-led training. Simplilearn for Business offers industry-aligned, hands-on learning and expert-led instruction with real-world projects enabling immediate application in a professional environment. Industry-relevant content, expert instructions, hands-on projects, and flexible learning are all strengths of Simplilearn for Business..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“The best features that Simplilearn for Business offers are that if we complete one certification course, they offer multiple courses, which makes it possible for us to learn in our free time and also helps in completing other certifications. For example, if I complete AI for Scrum Masters, I get the Scrum Master certification course free, and with over 600 courses available, it is really very helpful.

“Having access to these additional courses has benefited me greatly. It has been a month since I completed my certification, and I have started my next certification in agile, specifically the green belt course in safe systems, which is helping me a lot. Even though I haven't completed my second course yet, it is still very beneficial.

“Simplilearn for Business has positively impacted my organization, as I mentioned previously, due to providing multiple courses in a single shot, which I loved. Specific outcomes or results I've seen since using Simplilearn for Business include improvements in team performance and engagement. During planning, reviews, retros, or other meetings, I have seen that we engage team members more effectively, which we learned through Simplilearn, so it is helpful..”

S Subasrikavya

Senior engineer at Bosch Global software technology and solutions

[Read full review](#) 

“The best features Simplilearn for Business offers are the best industry expert knowledge transfer. The lab sessions were effective, and the doubt-clearing sessions were also very helpful.

“Simplilearn for Business has impacted my organization positively, as most of my team members have gained more knowledge about the day-to-day activities that we are doing. We have sped up the activities with the help of Simplilearn for Business.

“We have improved our productivity because of Simplilearn for Business. We were taking time to analyze the code or other issues. After the certifications and the courses which I completed on Simplilearn for Business, we are able to understand the issue with minimal time and we troubleshoot the issues with quicker actions. We also understood network terminologies very well. The overall team is performing well.

“The trainers in the lab sessions of Simplilearn for Business explained concepts with real-world examples and hands-on labs, which helped me to gain confidence in applying what I learned. The learning portal was user-friendly, and I did not face any technical issues during the course. I also liked the pace of the sessions and the support provided whenever I had doubts. Overall, this course helped me strengthen my cloud foundations and improve my practical knowledge..”

Associate Product ENginner at a tech vendor with 5,001-10,000 employees

“Simplilearn for Business offers live classes for every course, along with a self-learning phase that includes recorded videos, making both very useful. I can register for any classes, and if due to work or personal reasons I am unable to attend the registered class at that particular time, I also have a recorded session that will be very useful to continue the learning without any time restrictions.

Simplilearn for Business offers a lab platform where I can explore whatever I am learning, which is one thing I wanted to mention specifically. The certifications require at least 85% of the self-learning to be completed or 80% of the live classes to be watched or attended in order to be eligible, and there are many practices during the live classes that are available and very useful.

Since I started using Simplilearn for Business, I personally upgraded my skill set in AI and ML. In the new upcoming technologies, we have to be very competitive to survive in the industry. Simplilearn for Business offers various varieties of courses, certifications, and some master programs. By attending those, I upskilled myself and gained so much knowledge through the live sessions, which they plan with gaps to work out and reiterate ourselves on the learned content of the course. This way, it has a big impact in the organization.

I received measurable benefits from Simplilearn for Business. For example, before attending the AI Engineer Master Program, I was manually coding, but after understanding and attending this program, I learned so many AI tools that could help in my day-to-day activities, which improved my productivity significantly. Previously, manually creating one application took at least a week. .”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

Other Solutions Considered

I evaluated other options before choosing Simplilearn for Business, such as LinkedIn Learning Enterprise, but I felt the content was not worth learning or there was not much available, and the upcoming courses were not listed there.

Tushar_Gupta

Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“I was using Udemy for Business previously before switching to Simplilearn for Business. My organization provided the option for Simplilearn for me to explore, and I liked Simplilearn for Business very much..”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“I honestly did not evaluate any other options, but I was using Udemy for Business, and I would say the course content in Simplilearn for Business compared to Udemy is much more impactful..”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“Based on my experience with Coursera and Simplilearn for Business, I would recommend giving Simplilearn for Business a try. I cannot rank it above Coursera, but I will definitely say it is worth trying. I prefer Coursera more than Simplilearn for Business..”

Sai Rohith

Associate Product Engineer at Temenos AG

[Read full review](#) 

“Previously, we were using Pluralsight, which was a really great platform as well, but I am not really sure why we switched to Simplilearn for Business, since that was an organizational management decision..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

“I did not use a different solution before Simplilearn for Business.

“This was my first platform, so I did not evaluate other options before choosing Simplilearn for Business..”

ROI

Real user quotes about their ROI:

I have seen a return on investment as skill development boosted the outcome and productivity of all employees, and the knowledge gap was fixed, thereby improving their knowledge and upskilling themselves.

Tushar_Gupta

Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“I have seen a positive return on investment with Simplilearn for Business. Accessing multiple course certifications at a low cost feels very positive to me..”

S Subasrikavya

Senior engineer at Bosch Global software technology and solutions

[Read full review](#) 

“After learning the AI modules and AI technology from Simplilearn for Business, I see a return on investment as we can implement what we learned in our project, which saves time and enhances our ability to work faster because of AI and how straightforward it is to implement..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“There are several returns on investment, one being upskilling ourselves. Since Simplilearn for Business is partnered with BGSW, I received the Simplilearn for Business license without any cost, and with the several courses available on the platform, there is no cost involved for me..”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“I have seen a return on investment through faster onboarding, as without Simplilearn for Business, we would have faced a trial and error method to implement our products on a new cloud platform without prior experience, and we were able to understand the topics and attend workshops that resulted in verifiable outcomes..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

“I have seen a return on investment from using Simplilearn for Business through time saved. Even if I were to take some of the courses offered offline, I would need to spend significant time learning and then applying that knowledge. However, the Simplilearn for Business courses are comprehensive, covering most details and being highly relevant and helpful for me..”

Srimugundhan Sp

QA Lead at Trane Technologies

[Read full review](#) 

Use Case

“Simplilearn for Business is designed to obtain certifications in various technologies and to upskill in AI/ML, machine learning, prompt engineering, and other cloud and DevOps-related areas. I have used Simplilearn for Business certification courses for AWS Certified Solutions Architect certification.

“My experience with the AWS certification course through Simplilearn for Business helped me significantly with my day-to-day growth, day-to-day work, and career development to build scalable applications and deploy them over the cloud..”

Tushar_Gupta

Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“My main use case for Simplilearn for Business is learning new courses related to my field, and as the current market is focused on AI, it is valuable to have AI courses available, which adds to my knowledge.

“A specific example of a course I completed through Simplilearn for Business that stood out to me is the AI engineer course, which was a master's program, along with other related AI courses like ChatGPT and additional courses.

“In our project, we will be applying AI skills to create test cases or implement new features, where I will be using AI processes and prompt engineering techniques..”

Akshaychandeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“I mainly use Simplilearn for Business to upskill myself, and I hope the same for my team.

I recently completed the AI Engineer Master Program through Simplilearn for Business, and it was a very well-structured path to upskill in AI and ML.

In my team, Simplilearn for Business solves the main business problem of skill gaps. Since new tools and new technology evolve quickly, it becomes difficult to rely only on internal training. Instead of relying on internal training alone, having a platform Simplilearn for Business is very useful, and my colleagues in my team can easily learn and consistently improve their skill sets. .”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“I have learned many cloud courses on Simplilearn for Business platform. It was very effective and useful.

“I used Simplilearn for Business to learn AWS courses, and I have completed AWS certifications based on the knowledge that I gained using Simplilearn for Business.

“I have been working with Temenos as an Associate Product Engineer, where I work closely with the cloud team. I gained more knowledge about cloud, Azure DevOps, and Kubernetes and Docker using Simplilearn for Business. It has helped me in the overall activities of my day-to-day job..”

Verified user

[Read full review](#) 

Associate Product ENginer at a tech vendor with 5,001-10,000 employees

“My main use case for Simplilearn for Business is that I have completed my GenAI for Product Owners and Scrum Masters, and currently, I'm working as a Senior Engineer, so I would like to enhance my profile as a Scrum Master. In that Scrum Master role, I'm a proxy Scrum Master for my team, and to enhance that role and keep myself as a leader, I chose this course, which clearly explains the GenAI fundamentals and bridges them directly to practical agile use cases. It also helps me understand how GenAI can support the backlog refinement and sprint review, retro, and enhance stakeholder communication to generate better product insights.

“I can give you a quick specific example of how I applied something I learned from the course in my daily work: the learning culture was well organized, and the modules were concise and impactful, with the examples provided during the sessions being realistic and in line with real product scenarios. While giving a retro meeting, I can ask for individual feedback from my team members and enhance the demerits from the previous retro in the next sprint, and also manage story points for each individual member, minimizing overload when necessary. These scenarios proved really helpful and I implemented a bit of them in my real life, making it easier to think about applying GenAI tools in my day-to-day role, and I found the learning platform to be really helpful..”

S Subasrikavya

Senior engineer at Bosch Global software technology and solutions

[Read full review](#) 

“Simplilearn for Business is primarily used for upskilling on cloud technologies, such as Terraform, AWS, or any IAM related functionalities, as our company contracted Simplilearn for Business to provide and upskill our technology base.

“One specific example of a course my team took recently using Simplilearn for Business is the AWS IAM management course, which we used because we wanted to onboard our Infinity product on AWS, while we are primarily focused on the Azure platform, to make it cloud agnostic.

“In addition to that course, I also learned about AWS storage accounts and virtual machines, which was really helpful because they call it EC2, not virtual machines, and it goes in depth and not just the basics..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“Simplilearn for Business is deployed in my organization. When I open the website, I see that it displays b.s.lms.simplylearn.com, but I am not entirely certain of this detail..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

Customer Service and Support

Customer support for Simplilearn for Business is quite good. They generally reply within 24 hours for any issues and try to fix them as quickly as possible.

Tushar_Gupta

Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“The customer support for Simplilearn for Business is a bit delayed, as their response comes late, a few days after I create the ticket, typically after two or three days. I would rate it a seven out of ten..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“I raised an incident with Simplilearn for Business customer support because my certification was not issued. Just after raising my request, it was clarified very quickly and I got a solution. It was great..”

Verified user

Associate Product ENginer at a tech vendor with 5,001-10,000 employees

[Read full review](#) 

“For every course, there is a learner support manager available throughout the live sessions, and if I have any doubts on Simplilearn for Business, they provide support. I really appreciate the customer support; for any query that I mail to them, they respond immediately..”

Sundaram Ranjeth

[Read full review](#) 

Lead Software Engineer at a tech vendor with 10,001+ employees

“I have not had much experience with customer support for Simplilearn for Business. However, I recently received a mail from a person asking me to share my review on three different platforms about Simplilearn Hub to receive an Amazon gift voucher, so I hope that interaction goes well..”

S Subasrikavya

[Read full review](#) 

Senior engineer at Bosch Global software technology and solutions

“I did have to reach out to customer support due to my credentials not working upon logging in, and they provided a very swift response to unblock me quickly, making the experience overall pretty swift and efficient.

“For others looking into using Simplilearn for Business, I would give the customer support a nine out of ten, deducting one point for the lack of a chatbot or a chat experience. My advice would be to go through the course as a starting point, but for in-depth knowledge and hands-on experience, experimenting themselves or learning through official documentation will solidify their fundamentals..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

Other Advice

“My advice to others looking into using Simplilearn for Business is that if we take individual courses, we need to pay separately. However, with the business offer, we can pay for a single course and access multiple certifications, so I would recommend considering that. I would rate my overall experience with Simplilearn for Business as a 9..”

S Subasrikavya

Senior engineer at Bosch Global software technology and solutions

[Read full review](#) 

“Regarding the materials, they are downloadable but not interactive, and I use them to quickly refresh on the topics in case I have not worked on those technologies for a longer duration of time, helping me quickly catch up. My overall review rating for Simplilearn for Business is eight out of ten..”

Abhishekdp Dariwal

Lead Engineer at Temenos AG

[Read full review](#) 

“My advice for others looking into using Simplilearn for Business is to be clear on the business outcome first and choose the role-based learning path instead of random courses. Plan the learning time into the work schedule, leveraging live classes and projects, and treat it as more than just video content. Align certification with actual job use and track skill gain instead of just course completion. I would rate my overall experience with Simplilearn for Business an eight out of ten..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“If you are considering Simplilearn for Business, my advice would be to start by clearly identifying your organization's skill gap and training goals, and map employees into the right learning path. Simplilearn for Business works best when learning is structured and aligned with job roles rather than allowing random course selection. It is also good to encourage teams to set aside dedicated learning time each week because consistency is key to getting real value from the courses. Finally, plan for some additional hands-on practices outside the platform, especially during your day-to-day work activities. I rated this review as a nine..”

Sundaram Ranjeth

Lead Software Engineer at a tech vendor with 10,001+ employees

[Read full review](#) 

“The advice I would give to others looking into using Simplilearn for Business is that they should use it for upskilling and learning new things. It has all-in-one courses, so they do not have to search multiple platforms.

“When using Simplilearn for Business, the platform should offer gift cards or gifts

so that if a user is learning and actually completing certification courses, they should be honored with points or gifts.

“I would rate this review nine out of ten..”

Akshaychangdeo Selokar

Lead Engineer at Bosch

[Read full review](#) 

“I would easily give Simplilearn for Business a rating of 10 out of 10.

“I feel Simplilearn for Business deserves that rating because I felt it is the best. I have explored many other platforms and other media platforms to learn this knowledge, but Simplilearn for Business helped me to understand with minimal time.

“My advice to others looking into using Simplilearn for Business is to not over-explore anything else. Just go for Simplilearn for Business. It is the best platform I would suggest for any other trainers.

“I have no additional thoughts about Simplilearn for Business before we wrap up. My overall review rating for Simplilearn for Business is 10 out of 10..”
