Barracuda Cloud-to-Cloud Backup

Barracuda Cloud-to-Cloud Backup

Recap

Barracuda Cloud-to-Cloud Backup offers seamless integration with Microsoft 365, delivering efficient data protection with quick restoration, robust security, unlimited retention, and intuitive management, minimizing data loss and enhancing overall cybersecurity.

Specifically designed for protecting Microsoft 365 environments, Barracuda Cloud-to-Cloud Backup excels at backing up Exchange, OneDrive, SharePoint, Teams, and Entra ID. Its user-friendly setup and management simplify creating backup schedules while ensuring swift data recovery. The tool is engineered for robust data protection, integrating seamlessly to safeguard against data loss and malicious activities, reinforcing cybersecurity and disaster recovery plans.

What are the key features of Barracuda Cloud-to-Cloud Backup?

- **Intuitive Interface:** Easy to navigate, simplifying backup management.
- **Quick Restoration:** Enables fast data recovery to minimize downtime.
- **Microsoft 365 Integration:** Seamlessly integrates with the entire suite for comprehensive protection.
- **Unlimited Retention:** Allows indefinite retention of backups to meet diverse needs.
- **Robust Security:** Features 256-bit encryption ensuring data integrity and security.

What benefits and ROI should be considered?

- **Ease of Setup:** Simplifies initial configuration and ongoing management.
- **Data Recovery Efficiency:** Reduces data loss risk, crucial for business continuity.
- **Ransomware Detection:** Offers advanced protection against malicious threats.
- **Cost-Effective:** Provides a budget-friendly backup solution for Microsoft 365.

In industries where data security and compliance are paramount, Barracuda Cloud-to-Cloud Backup is invaluable for safeguarding sensitive information. Financial institutions can rely on its quick data restoration and robust security features, while healthcare providers benefit from its compliance support and ease of data recovery, ensuring patient information remains protected.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “Barracuda Cloud-to-Cloud Backup really helped considerably with getting healthcare storage and backups back up quickly.”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

- ✓ “Overall, I am a very satisfied user of Barracuda Cloud-to-Cloud Backup.”

Liam Trosad

Full Stack Developer at BairesDev

- ✓ “Barracuda Cloud-to-Cloud Backup has been a reliable and valuable solution for our organization.”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

- ✓ “Barracuda Cloud-to-Cloud Backup has positively impacted our organization by improving our overall data protection and recovery strategy.”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

“Barracuda Cloud-to-Cloud Backup support is 10 out of 10. Once a customer buys any product, they can instantly get support from the Barracuda product serial number with this local team.”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

“We've noticed fewer data losses by 90% compared to our previous tool since implementing Barracuda Cloud-to-Cloud Backup.”

Fridah Gilberto

Senior Network Engineer at KDInfotech

“Barracuda Cloud-to-Cloud Backup positively impacts my organization by making things easier for my team, allowing them to have more time for their lives and not spend excessive time in the office.”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

What users had to say about valuable features:

“The best features Barracuda Cloud-to-Cloud Backup offers are ease of access and a good, easy process for restoring OneDrive or mailbox.

“What makes the restore process easy for me is that the interface is intuitive; I just have to click through the steps to completion.

“Barracuda Cloud-to-Cloud Backup has positively impacted my organization by helping us with disaster recovery planning and providing redundancy. In case of data loss, we can rely on Barracuda Cloud-to-Cloud Backup. A specific example of how Barracuda Cloud-to-Cloud Backup has helped with disaster recovery is that users often come back to us saying they were unable to find a file, and we are able to locate and restore that file from the backup..”

Tchauhan Sarkan

sr sys admin at a energy/utilities company with 11-50 employees

[Read full review](#) 

“The best features Barracuda Cloud-to-Cloud Backup offers are the automated cloud backups, granular recovery options, and ease of management. I particularly appreciate the ability to quickly restore individual emails, files, folders, or entire workloads without any complex procedures. The centralized dashboard provides good visibility into backup status, and the solution offers reliable protection for Microsoft 365 components such as Exchange Online, OneDrive, SharePoint, and Teams. Overall, it combines simplicity with strong recovery capabilities.

“Barracuda Cloud-to-Cloud Backup has positively impacted our organization by improving our overall data protection and recovery strategy. The biggest benefit is the ability to quickly recover deleted or lost data without significant downtime. It has reduced the risk associated with accidental deletions and retention requirements while simplifying backup management. We have also seen faster response times for user recovery requests and greater confidence that critical Microsoft 365 data remains protected and recoverable when needed..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“In my opinion, the best features Barracuda Cloud-to-Cloud Backup offers include easy restoration, protection from ransomware, and protection against human error. These features make my life easier and more useful for everything urgent and critical.

The restore process with Barracuda Cloud-to-Cloud Backup is easy. The implementation uses Microsoft 365, which connects to Barracuda, and Barracuda has an option for restoration, such as snapshots, allowing for quick recovery and a smooth process.

Additionally, there is a feature called granular restore, which makes it easy for administrators to restore individual emails, folders, or entire inboxes. This is very helpful to assist users when they delete emails or are affected by viruses or ransomware in their email boxes.

Barracuda Cloud-to-Cloud Backup positively impacts my organization by making things easier for my team, allowing them to have more time for their lives and not spend excessive time in the office. It also helps my team achieve compliance audits, especially regarding security, as Barracuda Cloud-to-Cloud Backup is compliant with PCI DSS, GDPR, and ISO 27001. It is very helpful for us, and it makes life easy for our administrators, with no complicated tools, which benefits our IT department..”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup really helped considerably with getting healthcare storage and backups back up quickly. We had an issue with some of the customers immediately paying the ransom for ransomware before we were even notified because hospitals cannot have downtime. Having records tied up is problematic for an industry where they literally need to be operational 24/7. When ransomware attacks came, and they came often, having features where you can have air-gap backup storage and isolate it from Microsoft 365 was a huge help so we could get them up quickly.

“Barracuda Cloud-to-Cloud Backup has role-based access control, which is great, and multi-factor authentication. A very important feature is that it air-gaps backup storage, isolating it from Microsoft 365. This makes it a strong line of defense—the last line of defense actually for SaaS ransomware recovery. You also have malware scanning on restore.

“Regarding governance, Barracuda Cloud-to-Cloud Backup has compliance and legal holds, long-term retention, eDiscovery, and exports for compliance. It is not like Commvault, which has deeper enterprise features, but it is strong enough for most companies between small and mid-sized..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“The best features that Barracuda Cloud-to-Cloud Backup offers are automated backup, granular recovery options, and the ease of restoring Microsoft 365 data. The centralized management interface makes monitoring and administration simple. We also value the reliability of the backup process and the ability to quickly recover email, files, and other business-critical data. This makes day-to-day protection efficient and dependable.

“Barracuda Cloud-to-Cloud Backup provides clear visibility into backup status and overall data protection health through its reporting capabilities. From a security perspective, the solution offers confidence that Office 365 data remains protected and recoverable when needed. The interface is intuitive, making it easy to track backup activities and verify successful protection. This feature contributes to a reliable and well-managed backup environment.

“Barracuda Cloud-to-Cloud Backup has positively impacted our organization by helping improve our overall data protection and recovery readiness. It has reduced the time and effort required to recover Office 365 data, enabling faster resolution for user requests. The automated backup process has minimized administrative overhead while ensuring consistent protection of business-critical information. Overall, it has enhanced operational efficiency and provided greater confidence in our data protective capabilities..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“The best features Barracuda Cloud-to-Cloud Backup offers are unlimited storage and end-to-end encryption.

“Unlimited storage and end-to-end encryption have helped my organization since we had multiple geolocation employees, and some of the mailboxes are very large. The storage was unlimited and the backing up was secured using AES 256, so whatever compliance requirements were necessary, they were met for us.

“Barracuda Cloud-to-Cloud Backup has positively impacted my organization as it was very useful for us to back up a huge amount of data with many large employees.

“I have seen specific outcomes, as whenever I wanted data, it was very useful for us to restore. The implementation was very easy since it's a SaaS-based solution; I just connected our 365 tenant and started backing up all the data from day one.

“Regarding Barracuda Cloud-to-Cloud Backup's AI capabilities, I think its governance and security are good since it has end-to-end encryption, which allows us to be compliant.

“The accuracy and reliability of output from Barracuda Cloud-to-Cloud Backup were good, as whenever I wanted to restore the data, it was always available..”

IT Operation Manager at a tech vendor with 1,001-5,000 employees

Other Solutions Considered

“I did not previously use a different solution; we initially used a Barracuda on-premises solution when we had only one location, but later we moved to the cloud..”

Validated user

IT Operation Manager at a tech vendor with 1,001-5,000 employees

[Read full review](#) 

“I did not evaluate other options before choosing Barracuda Cloud-to-Cloud Backup since we already had this solution on-premises, so we went with the cloud solution due to a good discount..”

Validated user

IT Operation Manager at a tech vendor with 1,001-5,000 employees

[Read full review](#) 

“Before Barracuda Cloud-to-Cloud Backup, I backed up directly to network-attached storage, but as my environment grew, I discovered it on Azure. I initially used Bacula, but now I only use Barracuda Cloud-to-Cloud Backup..”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

[Read full review](#) 

“We had Veeam, and we used Veeam before choosing Barracuda Cloud-to-Cloud Backup. There were multiple ones used. When you are in an MSP, you have various different backup and storage solutions, some dedicated to specific customers and some for specific things you are working on or doing..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“Another feature I value in Barracuda Cloud-to-Cloud Backup is the automated backup process. Once configured, it requires very minimal manual intervention and constantly protects the data in the background. The centralized management console provides clear visibility into the backup and recovery activities, making administration simple. This has reduced the operational overhead and allowed the team to focus on other critical tasks while maintaining a comprehensive backup and recovery strategy..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup really helped considerably with getting healthcare storage and backups back up quickly. We had an issue with some of the customers immediately paying the ransom for ransomware before we were even notified because hospitals cannot have downtime.

“We had several different backup solutions before Barracuda Cloud-to-Cloud Backup, including EMC, Dell, or SolarWinds backup solutions. We did not cancel any of those. We had multiple ones used, some dedicated to specific customers and some not. There were multiple solutions, and sometimes we had to bring in others that were less expensive. In this case, SaaS Barracuda Cloud-to-Cloud Backup was utilized specifically because of the ransomware feature that it had and worked within a SaaS environment..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

ROI

Real user quotes about their ROI:

“I see a return on investment in Barracuda Cloud-to-Cloud Backup; however, the budgeting depends on how important this software is in helping our organization..”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup support is 10 out of 10. Once a customer buys any product, they can instantly get support from the Barracuda product serial number with this local team. We have locally in Made in India, Bangalore, but it is a global American team that will, within half an hour, get instant support. This includes initial support for how to run the setup, initiate the setup for the configuration, setup, auditing, or anything..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup definitely improved confidence within the IT team. The hospitals would not be able to access any of their data with the ransomware attacks, and they would pay. We had one instance where it happened twice in two years with one hospital, and they paid both times. Having Barracuda's protection cut that down significantly. If we needed to get the hospital back up, we had ransomware recovery within a SaaS environment. That was a great thing..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“We have been seeing a positive return on investment from Barracuda Cloud-to-Cloud Backup. The solution has reduced the time required for backup administration and data recovery, saving several hours of IT effort each month. For example, restoring deleted emails or files can now be completed in minutes rather than hours. The automated backup process also minimizes manual intervention, allowing our IT team to focus on higher-value tasks while maintaining strong data protection..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“We have seen a return on investment with Barracuda Cloud-to-Cloud Backup, primarily through time savings and operational efficiency. The automated backup processes reduce the amount of manual administrative work, while the fast recovery capabilities help resolve user requests much more quickly. Although I do not have a specific financial metric to share, we have reduced the time spent on backup management and incident resolution, allowing the team to focus on other strategic and operational tasks. The ability to quickly restore lost data has helped minimize business disruption and improve productivity..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“I have seen a return on investment as we have been able to save approximately 65% of our cost compared to the previous tool when we were using M365 for all users as our backup solution. It is now safer to move data from M365 as we are sure that the data is well backed up. This has freed up resources needed for an on-premises data center. We have also been able to restore files in many incidents that would have required end-users a lot of work to restore lost data. This has saved time and cost. It has also improved our data since we have not had any data loss since we started using this tool..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

Use Case

“My main use case for Barracuda Cloud-to-Cloud Backup is backing up Microsoft 365 data such as Exchange Online, SharePoint, emails, OneDrive, and Teams data. I used a SaaS-based application for backing up my Microsoft 365 data, as we had around 20,000 plus employees whose data needed to be backed up to the cloud..”

Validated user

IT Operation Manager at a tech vendor with 1,001-5,000 employees

[Read full review](#) 

“My main use case for Barracuda Cloud-to-Cloud Backup is to take backup of Office 365 and Intune.

“To back up Office 365, I use Barracuda Cloud-to-Cloud Backup to recover files or mailboxes, and to restore deleted emails from the backup..”

Tchauhan Sarkan

sr sys admin at a energy/utilities company with 11-50 employees

[Read full review](#) 

“My main use case for Barracuda Cloud-to-Cloud Backup is to make it easy to back up for any organization.

I use Barracuda Cloud-to-Cloud Backup for my backup of Microsoft 365, which includes automatic backups for Exchange Online email, OneDrive for Business, and SharePoint. Additionally, I am able to restore individual emails using that feature. When users lose their phone or laptop and forget their password, perhaps due to the urgency of a lost laptop, I must restore their data. Sometimes, users may delete all their emails or experience a virus that deletes all their emails, and that is the case I handle..”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup is our main solution for protecting Microsoft 365 data, including Exchange Online, OneDrive, SharePoint, and Teams. On a day-to-day basis, I monitor backup status, verify successful backups, and respond to any user requests for data recovery when they accidentally delete emails or files. For example, if a user deletes an important mailbox folder or a SharePoint document, we can quickly restore the required data from the previous backup point without disrupting business operations.

“Barracuda Cloud-to-Cloud Backup gives us the confidence that our Microsoft 365 data is protected and easily recoverable when needed. The centralized management portal reduces the administrative effort, while the granular restore operations help us respond quickly to user requests. It has become an important part of our overall data protection and business continuity strategy..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“My main use case for Barracuda Cloud-to-Cloud Backup is protecting Microsoft Office 365 data, including Exchange Online, OneDrive, SharePoint, and Teams. On a day-to-day basis, we use it to ensure critical business data is backed up and easily recoverable. For example, if a user accidentally deletes an email or file, we can quickly restore the required data with minimal disruption. Barracuda Cloud-to-Cloud Backup provides peace of mind and helps maintain data availability.

“Barracuda Cloud-to-Cloud Backup has significantly improved our Office 365 data protection strategy by providing automated and reliable backup. The solution helps ensure that important email, document, and collaboration data remain protected against accidental deletion or data loss. Recovery is straightforward and efficient, reducing downtime and administrative effort. Overall, it has strengthened our data resilience and compliance posture..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“I started using Barracuda Cloud-to-Cloud Backup probably in 2016 with NTT Data. There are various different solutions that can be used with storage and backup. This was used primarily for the Azure environment and Microsoft Exchange 365.

“Since it was used within the hospitals of NTT Data, an MSP managed healthcare environment, there were significant savings because of ransomware attacks. We were able to get things back up and running quickly.

“We had several different backup solutions before Barracuda Cloud-to-Cloud Backup, including EMC, Dell, or SolarWinds backup solutions. We did not cancel any of those. We had multiple ones used, some dedicated to specific customers and some not. There were multiple solutions, and sometimes we had to bring in others that were less expensive. In this case, SaaS Barracuda Cloud-to-Cloud Backup was utilized specifically because of the ransomware feature that it had and worked within a SaaS environment.

“Barracuda Cloud-to-Cloud Backup is easy to deploy. It took several minutes to deploy it. You have point-in-time recovery, which allows you to retrieve data from specific backup versions, including older ones. This is not always a feature for many backup tools. It did schedule on-demand backups..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“Barracuda Cloud-to-Cloud Backup backs up cloud data directly to Barracuda's cloud storage, and you have point-in-time recovery. Most importantly, I would say for any healthcare-based companies, ransomware resilient storage is key..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“My experience with pricing, setup cost, and licensing is that the price is more cost-effective compared to an M365 backup solution. The setup was straightforward and easy..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“Our experience with Barracuda Cloud-to-Cloud Backup pricing and licensing has been positive. The licensing model is straightforward and easy to understand, making deployment and ongoing management simple. The setup process was smooth and required minimal effort to get operational. Overall, the solution provides good value by combining reliable data protection with ease of administration..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“I have seen a return on investment through time saved. A lot of time was saved; for example, since it's a SaaS-based solution, one person can manage it. There was no manual work required, as it was fully automated, saving both time and money, especially since we had multiple locations with challenges in keeping the storage which could have been a higher cost. This was easy and cost-saving as well as time-saving for restoration; everything can be managed by one person from the console..”

Validated user

IT Operation Manager at a tech vendor with 1,001-5,000 employees

[Read full review](#) 

“My experience with pricing, setup cost, and licensing for Barracuda Cloud-to-Cloud Backup has been positive overall. The licensing model is straightforward and easy to understand, which simplifies budgeting and forecasting. Initial setup was relatively simple with no significant upfront investment since it is a cloud-based solution. From a value perspective, the cost is reasonable compared to the features and operational benefits it provides. Overall, I feel the pricing aligns well with the features and operational benefits delivered..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“I would recommend Barracuda Cloud-to-Cloud Backup because it's very easy to configure, easy to manage, and easy to utilize when needing to recover data faster.

“We have seen some improvements since we started using Barracuda Cloud-to-Cloud Backup.

“The solution has allowed us to retain data for employees that are no longer with the company without requiring us to maintain any Office 365 licensing, making it very cost-effective.

“It helps me worry a little less that in the worst-case scenario, mailboxes and Teams are easily restorable to continue, at very least.

“It proves useful, for instance, where a user accidentally loses or deletes an important email or file in their mailbox or Teams, as what has been lost can easily be restored..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

[Read full review](#) 

Customer Service and Support

“I did not have any issues with Barracuda Cloud-to-Cloud Backup customer support. They answer the calls quickly if there is any need to speak with them. I rarely had to speak with them..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“I have not reached out to customer support for Barracuda Cloud-to-Cloud Backup, as I have not encountered any issues. I think it is a professional software with good customer service channels, but I have not needed to use them because Barracuda Cloud-to-Cloud Backup is very easy, understandable, and adaptable..”

Riendi Aziz P

Head Advisor Infrastructure Cloud Architect at Adrienutech

[Read full review](#) 

“My experience with Barracuda customer support has been very positive. The support team has been responsive, knowledgeable, and helpful whenever assistance has been required. Issues and queries have been addressed in a timely manner, helping minimize any operational impact. Overall, the support experience has contributed to our confidence in the solution and its ongoing reliability..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“The interface is user-friendly console access which is very accessible such that an L1 engineer or any non-technical person can manage this console regarding the parameter of how this data should be backed up daily. Users get the notification of how data can be restored. Reports about the daily backup completion or restoration can be obtained. Notifications are sent over email. Without any IT engineers, a customer IT team can manage that. There is no complexity for this manageability purpose..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“The user interface of Barracuda Cloud-to-Cloud Backup is very intuitive and user-friendly, and I have no problem with that.

“The customer support is very responsive and proactive, which I encounter no issues with.

“The customer support for Barracuda Cloud-to-Cloud Backup is very proactive and easy to access, 24/7, and they are very helpful..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

[Read full review](#) 

“My experience with customer support for Barracuda Cloud-to-Cloud Backup has been positive overall. The support team is responsive and knowledgeable, and they are generally able to assist with configuration, troubleshooting, and restore-related questions effectively. For more complex issues, the escalation process has been clear throughout each case. Overall, the support experience has met our expectations and helps ensure smooth operations.

“I would rate the customer support for Barracuda Cloud-to-Cloud Backup as eight out of ten. The support team is responsive, knowledgeable, and generally resolves issues in a timely manner. They provide good assistance for both operational and technical issues. The reason I would not rate it higher is that response times for complex cases and the escalation process sometimes can be improved. Overall, the support experience has been positive and dependable..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

Other Advice

“The advice I would give to others looking into using Barracuda Cloud-to-Cloud Backup is that if you are looking for an easy-to-use product, I would recommend this solution. I would rate this product a 9 overall..”

Tchauhan Sarkan

sr sys admin at a energy/utilities company with 11-50 employees

[Read full review](#) 

“The advice I would give to others looking into using Barracuda Cloud-to-Cloud Backup is that it's a very competitive product, and they can do the POC, and if it suits their use case, they can go ahead. I give this product a review rating of 10..”

Validated user

IT Operation Manager at a tech vendor with 1,001-5,000 employees

[Read full review](#) 

“My advice for others looking into using Barracuda Cloud-to-Cloud Backup would be to clearly understand your backup, retention, and recovery requirements before making a decision. If your organization relies heavily on Microsoft 365, Barracuda Cloud-to-Cloud Backup is a worthwhile contender. It is easy to deploy, easy to manage, and provides reliable recovery capabilities. I would also recommend testing the restore process during the evaluation phase to ensure it meets your business and compliance requirements. Overall, it is a solid solution for organizations looking to strengthen their cloud data protection strategy. I would rate this solution eight out of ten..”

Vibin Thomas

Technical Team Lead - Content Security at Valuepoint Systems

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup is great for the healthcare industry, which is what we used it for. It is perfect for small to medium-sized companies. When looking for storage scalability that is unlimited and easy to install, Barracuda Cloud-to-Cloud Backup is a great option. Regarding pricing, it is much cheaper than Veeam would be for Microsoft 365.

“I did not have any issues with Barracuda Cloud-to-Cloud Backup in the capacity that I used it. It is really great for small to medium-sized companies, and it is really key with Entra ID 365. If you are looking for something deeper, then [Rubrik](#) or Cohesity would be better options. It is compatible with Veeam, and I would say it has many features that work very well when comparing it with Veeam. It is something to consider if you have a small to mid-sized company, and within the healthcare environment, it is something that I would look at. I would rate this product a 13 out of 10 based on my overall experience..”

Esther Sultaana

Storage Consultant Storage at Hewlett Packard Enterprise

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup has been a reliable and valuable solution for our organization. It provides dependable Microsoft Office 365 protection, efficient recovery capabilities, and a simple management experience. The platform has helped strengthen our backup strategy while reducing administrative effort. We are very satisfied with its product performance and would confidently recommend it to any organization looking for a cloud backup solution.

“My advice for others looking into using Barracuda Cloud-to-Cloud Backup would be to clearly define your Office 365 data protection and recovery requirements before selecting a solution. Barracuda Cloud-to-Cloud Backup is easy to deploy, simple to manage, and provides reliable backup and recovery capabilities. Its automated protection and straightforward administration help reduce operational effort while ensuring business-critical data remains secure. Overall, it is a strong choice for any organization looking for dependable Microsoft Office 365 backup and recovery. I would rate this solution a 9 out of 10..”

Sufiyan Shaikh

Senior Technical Support Executive at digital track

[Read full review](#) 

“I give Barracuda Cloud-to-Cloud Backup a recommendation score of nine.

I chose the score of nine because it is almost perfect, but I cannot give a ten because there are still some simpler ways to improve it.

Regarding Barracuda Cloud-to-Cloud Backup's AI capabilities, it is compliant with all government regulations, which is helpful for me.

I find the accuracy and reliability of Barracuda Cloud-to-Cloud Backup's output is consistent, but I hope in the future it adapts to any language needs.

Barracuda Cloud-to-Cloud Backup is deployed in my organization as a hybrid cloud and on-premises solution.

For my cloud deployment, I use [Azure](#) and [Google Cloud](#).

I purchased Barracuda Cloud-to-Cloud Backup through the [Azure Marketplace](#), and I remember that clearly.

If you are looking into using Barracuda Cloud-to-Cloud Backup, I recommend it if you have a Microsoft 365 environment combined with hybrid cloud, and if you support many users' emails, as it will make your life easier. Barracuda Cloud-to-Cloud Backup is a tool that simplifies your operations.

I give Barracuda Cloud-to-Cloud Backup an overall rating of nine out of ten..”
