Product Recap

- Windows 2022 Server with support by ProComputers

Windows 2022 Server with support by ProComputers Recap

Windows 2022 Server with support by ProComputers offers an efficient and scalable platform ideal for demanding workloads. It integrates robust security features and cloud-ready capabilities that cater to business environments, providing a reliable foundation for enterprise IT infrastructure.

Windows 2022 Server with support by ProComputers is designed to enhance productivity and security, supporting modern application architectures and providing seamless integration with cloud services. This server operating system streamlines IT management and optimizes resource usage, making it suitable for businesses looking to upgrade their existing infrastructure or deploy new applications efficiently. Its advanced security measures and hybrid capabilities ensure that enterprises can operate securely while leveraging cloud innovations without compromising performance.

What are the key features of Windows 2022 Server with support by ProComputers?

- Advanced multi-layer security: Incorporates enhanced security controls to protect sensitive data.
- Hybrid capabilities with Azure: Facilitates seamless integration with Azure for cloud migration.
- Improved virtualization: Offers superior virtualization options for better resource management.
- Flexible containerization support: Enables deployment of apps across different environments.

What benefits or ROI can users expect when reviewing Windows 2022 Server with support by ProComputers?

- Increased efficiency: Offers streamlined processes leading to time and cost savings.
- Enhanced security: Comprehensive security measures minimize risk exposure.
- Cloud readiness: Facilitates a smooth transition to cloud-based operations.
- Scalability: Supports organizational growth with robust scalability features.

Windows 2022 Server with support by ProComputers is particularly effective in industries requiring high security, such as finance and healthcare, by providing platforms for compliance and data protection. It also benefits manufacturing and retail sectors through its scalability and modern application support, driving innovation and operational efficiency.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

"Customer support for Windows 2022 Server with support by ProComputers was phenomenal, especially when I needed quick assistance with Active Directory Domain Services."

Bhupender K

Senior Specialist Technology Specialist

"The Azure Arc integration helps me in my day-to-day work by allowing my on-premises server to also be integrated into this, enabling us to monitor all the servers in one place."

Rajendra Chavda

Senior System Administrator at a computer software company with 501-1,000 employees

"Windows 2022 Server with support by ProComputers positively impacts my organization by allowing us to install state-of-the-art equipment and guarantee their security."

Pablo Rodriguezbello

Líder Técnico at a insurance company with 10,001+ employees

©2026 PeerSpot, All Rights Reserved

"The customer support for Windows 2022 Server with support by ProComputers is faster and reliable."

Sithembiso Twala

Nintex Automation Cloud Specialist at a tech vendor with 1,001-5,000 employees

"The interface is friendly and very easy to understand, and the troubleshooting is also easier than on other OS."

Sukanta Panda

Technical Lead at HTC Global Services

What users had to say about valuable features:

©2026 PeerSpot, All Rights Reserved

"What I value most about Windows 2022 Server with support by ProComputers is that the interface is friendly and very easy to understand, and the troubleshooting is also easier than on other OS.

"I have tried using the remote working features in Windows 2022 Server with support by ProComputers.

"The remote working features are a good feature of Microsoft OS, and I find them helpful and effective.."

Sukanta Panda
Technical Lead at HTC Global Services

"The best features offered by Windows 2022 Server with support by ProComputers are simplicity and resource efficiency.

"Simplicity means that the processes have not changed compared to previous versions, and the economic aspect is that it does not consume as many resources.

"Windows 2022 Server with support by ProComputers positively impacts my organization by allowing us to install state-of-the-art equipment and guarantee their security.

"Before, we did not have up-to-date support, and now we can keep the servers protected and up to date. We are currently analyzing the situation to determine any other concrete benefits we have noticed since the migration to Windows 2022 Server with support by ProComputers.."

Pablo Rodriguezbello
Líder Técnico at a insurance company with 10,001+ employees

The best features that Windows 2022 Server with support by ProComputers offers are PowerShell and the latest features of Windows Server 2022.

In my day-to-day use case of PowerShell with Windows 2022 Server with support by ProComputers, I perform bulk operations such as user creation, user deletion, user disable, security group creation, and I also verify the replication.

“Regarding the features of Windows 2022 Server with support by ProComputers, it features a new view of Windows Server 2022 along with the latest PowerShell version, and it supports cloud integration with the operating system, which is very helpful.

“In terms of AI capabilities, Windows 2022 Server with support by ProComputers is very capable of providing AI services because it integrates with cloud services such as Azure Arc, which supports on-premises environments through Azure, making it very helpful. .”

Bhupender K
Senior Specialist Technology Specialist

The best features that Windows 2022 Server with support by ProComputers offers for me include secured store server capabilities, firmware protection, and improved protection against certain threats. It is a stable platform for hosting SharePoint-related services, including SharePoint server and K2 development components. Another benefit is its suitability for hybrid cloud integrations, particularly when integrating with Azure services for hybrid infrastructure and management. It also supports performance and storage improvements through features such as storage spaces direct and SMB enhancements, though this depends on server configurations and licensing.

Additionally, it is user-friendly for remote administration. The security features have helped me in my work by protecting against cybersecurity threats, including malware, which has made a difference.

“The main benefits of Windows 2022 Server with support by ProComputers are the security, better performance, stability, and reliable support for enterprise applications. For my work with SharePoint, Nintex, and SQL, it has provided a solid platform for building development environments, hosting applications, and troubleshooting technical issues. I found PowerShell useful for automating administration tasks and managing server configurations. With ProComputers support, another benefit is receiving technical assistance when issues arise, which helps to reduce downtime and keep systems running continuously. .”

“The best features Windows 2022 Server with support by ProComputers offers are secure-core server and Azure Arc integration.

“The Azure Arc integration helps me in my day-to-day work by allowing my on-premises server to also be integrated into this, enabling us to monitor all the servers in one place.

“The features include default security, TLS 1.3, and DOH, with Transport Layer Security 1.3 enabling default DNS over HTTPS.

“Regarding Windows 2022 Server with support by ProComputers' AI capabilities, I believe it is improving the AI infrastructure in security, secure-core server protection, encryption, connectivity, and Hyper-V isolation.

“The accuracy and reliability of output for Windows 2022 Server with support by ProComputers is extremely good, with algorithm control and identity, Zero Trust, Active Directory, and Azure Arc, plus data loss prevention (DLP) also integrated in this..”

ROI

Real user quotes about their ROI:

I have seen a return on investment as Active Directory serves as the baseline for any organization, allowing me to manage my user base and workforce efficiently. When a new person joins, their account gets created first in Active Directory, and with the upgrade to Windows Server 2022, the performance improved significantly, ensuring the investment was made wisely to help the organization grow.

Use Case

"My main use case for Windows 2022 Server with support by ProComputers is as a domain controller and file server.

"A quick specific example of how I use it as a domain controller and file server in my organization includes managing group policy, the file server, resource server, and FSMO role.."

Rajendra Chavda

Senior System Administrator at a computer software company with 501-1,000 employees

"My use cases for Windows 2022 Server with support by ProComputers involve working as a Windows Wintel Admin or server Admin, where we take care of all the tasks, from the installation of the Windows server operating system through configuring all the tasks depending on the department. We are creating the AD, doing everything on the Windows side, and handling all the troubleshooting. If any teams are facing issues related to the OS, they ask us to fix those issues, and we fix those OS-level issues.."

"My main use case for Windows 2022 Server with support by ProComputers is application deployment.

"A specific example of an application that I have deployed using Windows 2022 Server with support by ProComputers is a Web Forms application.

"In my day-to-day work, I am in a process of migrating servers from Windows 2016 to Windows 2022, and I use it to carry out the migrations to Windows 2022.."

Pablo Rodriguezbello
Líder Técnico at a insurance company with 10,001+ employees

Read full review

My main use case for Windows 2022 Server with support by ProComputers has been to build a SharePoint platform and SQL environments, as well as the K2 Nintex platform and other applications that I have used for implementing portals and intranets.

One specific example I can provide is when I was building an Enterprise SharePoint environment and setting up development environments for SharePoint. I used Windows 2022 Server with support by ProComputers to configure the environment, support the application hosting, and troubleshoot compatibility and connectivity issues between the application layer and the backend. More recently, my focus has been on building development environments for K2 Nintex workflow solutions, with ProComputers providing support in this context. ."

My main use case for Windows 2022 Server with support by ProComputers is as an Active Directory specialist and Microsoft Entra ID administrator, where I need Windows 2022 Server with support by ProComputers to run the Active Directory Domain Services and DNS.

I use Windows 2022 Server with support by ProComputers for Active Directory and DNS in my daily work by supporting the infrastructure where I provide the Active Directory Domain Services related services and DNS as well as Group Policy, catering to around 4,000 users.

“For the main use case of Windows 2022 Server with support by ProComputers, when I use the Active Directory Domain Services, I need to place the servers in their respective locations to provide the AD services, making Windows Server the baseline operating system. Without Windows 2022 Server with support by ProComputers, I could not install the Active Directory Domain Services role, the DNS, or the Group Policy. .”

“I have contacted Microsoft support regarding Windows 2022 Server with support by ProComputers many times.

“About the quality and the speed of the support, sometimes the people provide immediate support on one call. In my recent experience, I had an issue where the server was unable to patch, so we opened a case, and it took almost two months to fix that issue. It depends on the issues; sometimes they give a quick solution, and sometimes it takes more time.

“I would give the support a score of seven on a scale from 1 to 10..”

“I have been working in my current field overall for almost five to six years.

“Regarding maintenance for Windows 2022 Server with support by ProComputers, it requires maintenance or downtime to update or upgrade something. Sometimes it asks for a reboot, and we can't reboot it since it is a production server, so we have to look for a maintenance window.

“For the overall score for Windows 2022 Server with support by ProComputers, I would give it a nine out of 10 for everything..”

Sukanta Panda
Technical Lead at HTC Global Services

Regarding Windows 2022 Server with support by ProComputers' AI capabilities, I value the proactive security reviews and clear compliance guidance to help maintain and secure a well-managed environment.

I believe Windows 2022 Server with support by ProComputers' AI capabilities can be useful for speeding up troubleshooting, finding information, and automating routine tasks, but accuracy and reliability depend on the quality of information provided and the complexity of the issue. Therefore, I verify AI-generated recommendations before applying them, especially when dealing with security server issues and applications.

“I would advise others looking to use Windows 2022 Server with support by ProComputers. I rate Windows 2022 Server with support by ProComputers a nine out of ten. .”

I would rate Windows 2022 Server with support by ProComputers a nine out of ten overall.

I chose nine out of ten for Windows 2022 Server with support by ProComputers because there is always scope for improvement, and I think there should be space for the organization to keep enhancing the product and the support.

“Windows 2022 Server with support by ProComputers is deployed in my organization using private cloud as well as physical servers, and I also utilize on-premises Active Directory, but the deployment is primarily done using a private cloud.

“I advise others considering Windows 2022 Server with support by ProComputers that it is essential for the environment to upgrade to the latest operating system, as it is more stable compared to Windows Server 2016 and includes latest features such as identity security, DNS administration, PKI and certificate management, PowerShell automation, Azure integration via Azure Arc, the latest PowerShell version, and support for Storage Replica, failover clustering, and Windows Admin Center, all of which make Windows Server 2022 a great product. .”
