Sharepoint 2010 on Windows server 2012r2-24x7

Sharepoint 2010 on Windows server 2012r2-24x7 Recap

Sharepoint 2010 on Windows Server 2012r2-24x7 features robust security, seamless Microsoft integration, and workflow automation, enhancing collaboration, file sharing, and document management.

Organizations leverage Sharepoint 2010 on Windows Server 2012r2-24x7 for online data storage and efficient business process automation. It offers improved communication and secure file sharing through real-time collaboration and mobile access. While the platform increases productivity with version history and access control, areas such as offline functionality and performance enhancement need focus. The outdated user experience and limited browser support are aspects requiring attention.

What are the key features of Sharepoint 2010 on Windows Server 2012r2-24x7?

- **Security:** Advanced access control and permission management.
- **Integration:** Compatible with Microsoft Office and Teams for enhanced file access.
- **Collaboration:** Real-time collaboration and mobile access for improved teamwork.
- **Automation:** Workflow automation simplifies task management.

What benefits and ROI can users expect when using Sharepoint 2010 on Windows Server 2012r2-24x7?

- **Cost Savings:** Streamlined communication reduces expenses.
- **Productivity:** Efficient task management enhances workflow.
- **Easy Onboarding:** Simplified processes for new team members.

In specific industries, Sharepoint 2010 on Windows Server 2012r2-24x7 is utilized for secure document management and collaboration. Manufacturing companies use it for managing complex workflows and storing files securely. In healthcare, it supports data consistency and real-time collaboration to ensure quality patient care.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “With Sharepoint 2010 on Windows server 2012r2-24x7, the collaboration, versioning control, and data accuracy improved, allowing us to finish the project in just one month or two instead of six, signifying a potential saving of four months worth of time and salary for the same project.”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

- ✓ “Sharepoint 2010 on Windows server 2012r2-24x7 has definitely impacted my organization positively because now we don't have to manually create folder structures in our local desktops.”

Validated user

Business Analyst, Product Owner at a non-profit with 10,001+ employees

- ✓ “The main feature of Sharepoint 2010 on Windows server 2012r2-24x7 is making document management easier because it is very simple to use, I can use the console web to share documents with some users, and it is very fast to edit the document together with other colleagues and share it without sending emails.”

A Bardone

Manager at a tech vendor with 10,001+ employees

“Please use Sharepoint 2010 on Windows server 2012r2-24x7. It is going to make your work good. It is going to make everything look easier, faster, and better. It will save your cost, arrange your files, and connect your staff and your client, everything all in one.”

Balogun Peter

Digital Magazine Manager at OMC System

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is that it serves as a great collaboration tool.”

Catherine Melody

Team Lead at Target

“Sharepoint 2010 on Windows server 2012r2-24x7 has positively impacted our organization by consolidating all company forms and documents into a single repository, creating a great intranet that avoids the issues of scattered file shares and email communications.”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

“There is definitely an improved turnaround because of using Sharepoint 2010 on Windows server 2012r2-24x7.”

Cliff Osborne

Application Developer at El Camino Hospital

What users had to say about valuable features:

“The best features Sharepoint 2010 on Windows server 2012r2-24x7 offers include an audit feature and the ability to maintain a backup of all files remotely by an administrator.

“Sharepoint 2010 on Windows server 2012r2-24x7 has positively impacted my organization by giving all users a backup, and whenever there are endpoint changes, they can easily switch over..”

Rajkumar Gupta

Manager, Ibms Projects Operations & Corporate Information Technology at
Yotta Infrastructure Solutions LLP

“The best features Sharepoint 2010 on Windows server 2012r2-24x7 offers include a new Fluent ribbon-type interface that modernizes the look, making it more compatible with the changes in Office and still favored by Microsoft today, along with facilities for managing metadata. It also introduces Office Web Apps, allowing for direct editing of Word, Excel, and PowerPoint documents in the browser, which wasn't possible in previous versions, enhancing usability and collaboration capabilities.

“My team responded positively to these changes, finding that collaboration improved significantly, as we previously faced constant complaints about locked Excel spreadsheets on file shares. The ability for multiple people to edit documents in Sharepoint 2010 on Windows server 2012r2-24x7 simultaneously transformed how we worked, as it eliminated the frustrations of file locking, making daily tasks much easier..”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

[Read full review](#) 

“The best features Sharepoint 2010 on Windows server 2012r2-24x7 offers is the way it makes work storage in one central place, making it look easy for colleagues and the HR to navigate and see different files all at once in one place.

“When you mention storage and easy navigation in Sharepoint 2010 on Windows server 2012r2-24x7, it saves time and reduces confusion. It makes all files accessible anytime, and it makes it easy for anybody without asking my colleagues for different files. I can just go there and pick files up and use them. It makes the work easier and faster, and it makes everything well organized.

“It makes it easy for you to search for any document in Sharepoint 2010 on Windows server 2012r2-24x7. You can create different folders and set different permissions for different files for different people and different staffs, and it is the best for me..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“Sharepoint 2010 on Windows server 2012r2-24x7 offers the ability to send an email when you update an area if you want to tag somebody in it or they're already tagged in an area, and I also appreciate that the link is easy to copy and paste in Slack for the team to go directly to Sharepoint 2010 on Windows server 2012r2-24x7 to see what you've created and give it a review and edit it there.

“I also value the permissions feature, so once a document is done, you can lock it and people can view it and share it, but it cannot be manipulated or changed if you are the owner of it. The integration with the planner tools is really helpful, allowing our team to use Sharepoint 2010 on Windows server 2012r2-24x7 in an agile way.

“Sharepoint 2010 on Windows server 2012r2-24x7 has positively impacted our organization by keeping us organized, allowing us to share our documentation with clients, and helping our team review things in a timely fashion. I have noticed specific outcomes, such as fewer mistakes because we have documents that we can lock down and not have to worry about a client changing anything when we're making a deal..”

Kristine Parrinelli

Agile Solutions Designer at a tech consulting company with 51-200 employees

[Read full review](#) 

“The main feature is the ease of use of Sharepoint 2010 on Windows server 2012r2-24x7. A minor area for improvement is the search functionality. Sometimes it is difficult to search some content by key or by key tag. However, the other functionality is very good.

“I also appreciate the tag functionality of Sharepoint 2010 on Windows server 2012r2-24x7. I can tag a folder in order to search all folders by tag.

“The main feature of Sharepoint 2010 on Windows server 2012r2-24x7 is making document management easier. Because it is very simple to use, I can use the console web to share documents from some users. It is very fast to edit the document together with other colleagues and share it without sending emails.

“The customer can see in a fast way if there is a user that needs to be removed because there are many documents and many users can use these documents. Very often, users can change their areas. When a user changes area, they cannot access some documents or some projects. Then the customer needs a fast way to check if a user is correctly removed or a fast way to remove a user from a folder..”

A Bardone

Manager at a tech vendor with 10,001+ employees

[Read full review](#) 

“Workflow in Sharepoint 2010 on Windows server 2012r2-24x7 has helped my teams by using it for Sharepoint access request forms. The workflow I use involves submission, and when the submission happens, there is an approval of the form. Approval goes to the manager, and once he approves it, it goes to the next phase. For final acceptance, we send it to an end user so he can check mark on it or indicate that the work is done. These are the approval processes we utilize, including out-of-the-box email approval and alerts sent by the system.

“Sharepoint 2010 on Windows server 2012r2-24x7 has saved time and improved productivity by enabling cost-saving measures. When using one place for all documents, your team can see everything in the latest mode. All they need to do is click the link to access the same place, and follow-up conversations occur on the same page. It definitely saves a lot of time and energy for teams, allowing them to focus less on email exchanges and more on project tasks.

“Sharepoint 2010 on Windows server 2012r2-24x7 has positively impacted my organization by providing very good collaboration capability. It includes a list, calendar, permissions, and everything that works great for everyone. It offers one centralized place, so there is no need to configure or go to multiple places looking for the same information. Once I update information, everybody syncs on the same data. It also enables tracking changes, restoring previous versions, maintaining document history, and sharing team calendars, organizing the same vision with different kinds of access. This feature definitely contributes to good progress in teams, making it very useful for any organization.

“Best features Sharepoint 2010 on Windows server 2012r2-24x7 offers include a list and permission capability, team collaboration capability, workflow and approval process capability. All of these capabilities are fantastic, including version control and permission-based access, providing one centralized place where everybody can see everything and update it. If we need to revert back, version control is there, and we can see how much use case it is. It is very efficient for business users. I am a Sharepoint user for a long time, so all of those features are fantastic..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

Other Solutions Considered

“We did not have a sophisticated solution before. We relied on file shares and email, which were unstructured and unorganized, prompting us to switch to Sharepoint 2010 on Windows server 2012r2-24x7..”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

[Read full review](#) 

“I have seen people talk about Slack and different ones before choosing Sharepoint 2010 on Windows server 2012r2-24x7. After I started using Sharepoint, I do not have any reason to use another. It has made my work easy and simple..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“Before choosing Sharepoint 2010 on Windows server 2012r2-24x7, I did not evaluate other options because we were already working with Microsoft products, so I decided to go with that..”

Kelghazouli Rasuli

Group IT Director with 1-10 employees

[Read full review](#) 

“I did not evaluate other options before choosing Sharepoint 2010 on Windows server 2012r2-24x7. However, I was aware of Sharepoint's capabilities beforehand. Many people use Google Workspace, which can be useful, but I prefer Sharepoint 2010 on Windows server 2012r2-24x7 because I am very familiar with it. I know how to control the web parts and permissions, so I prefer using this one..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

ROI

Real user quotes about their ROI:

“I have not seen a return on investment for Sharepoint 2010 on Windows server 2012r2-24x7. I probably have not seen a clear use case for the return on investment, but it has been a value addition..”

Rajkumar Gupta

Manager, Ibms Projects Operations & Corporate Information Technology at
Yotta Infrastructure Solutions LLP

[Read full review](#) 

“While I do not have specific metrics, I can say that time is saved because of how easily we are able to create a planner board, save documents, and share them with our partners and clients. As a small group, we have a controlled environment for our documentation and marketing images, allowing us to quickly access them..”

Kristine Parrinelli

Agile Solutions Designer at a tech consulting company with 51-200
employees

[Read full review](#) 

“While I do not have specific metrics, I can state that Sharepoint 2010 on Windows server 2012r2-24x7 led to significant time savings, particularly in collaboration, finding information, and onboarding new employees, but it did not directly affect our headcount or profitability..”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

[Read full review](#) 

“Regarding a return on investment from Sharepoint 2010 on Windows server 2012r2-24x7, fewer employees are needed. Money has been saved on raw files and printed documents. It has really saved time and the stress of overusing your phones for work when you have your work on a hub on your phone or any other device, laptop, or PC. It saves a lot..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“I have given the metrics relevant to Sharepoint 2010 on Windows server 2012r2-24x7, but I need my users to save a lot of time. Before using Sharepoint 2010 on Windows server 2012r2-24x7, they had to share files by email. They also shared files by USB key. With Sharepoint 2010 on Windows server 2012r2-24x7 instead, they can collaborate in a very fast way..”

A Bardone

Manager at a tech vendor with 10,001+ employees

[Read full review](#) 

“I do not have specific numbers regarding return on investment, but I can tell you that the processes that could be delayed due to ineffective collaboration could take six months to complete. With Sharepoint 2010 on Windows server 2012r2-24x7, the collaboration, versioning control, and data accuracy improved, allowing us to finish the project in just one month or two instead of six. This signifies a potential saving of four months worth of time and salary for the same project..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

[Read full review](#) 

Use Case

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is storing and backing up files from endpoint devices while sharing files securely across users..”

Rajkumar Gupta

Manager, Ibms Projects Operations & Corporate Information Technology at
Yotta Infrastructure Solutions LLP

[Read full review](#) 

“We use Sharepoint 2010 on Windows server 2012r2-24x7 on a 24x7 basis for team collaboration, teamwork, and work involvement.

“You can integrate Microsoft Word and Excel for financials and calculations with Sharepoint 2010 on Windows server 2012r2-24x7. We have been using it for large projects, and it has really helped to make our work clean and stored in one central place. We can hold our meetings on it and make use of different functions while keeping everything clean and well organized..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“My customer uses Sharepoint 2010 on Windows server 2012r2-24x7 for sharing files and content. I work in the development of an application that traces all the files and the permissions in the file. The goal of this application is to ensure that there is no user that is not approved or has been removed or needs to be removed in order to maintain updates and user access to files.

“Sharepoint 2010 on Windows server 2012r2-24x7 serves as a repository of project documentation for the customer. There is a folder structure with a root folder for each project. In the folder, the structure is defined in a way to have the same route and the same contents for each project. The main folders are related to contract offerings, technical documents, sales, and each meeting that advances the project..”

A Bardone

Manager at a tech vendor with 10,001+ employees

[Read full review](#) 

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 has been as an internal company intranet, serving as a repository for all our forms, procedures, and documents, as well as providing daily news and a monthly focus on a particular person. Primarily, it is the main company portal for all news, including how people submit expense reimbursements or apply for leave, making it the home place for all the company's internal forms and processes.

“Before using Sharepoint 2010 on Windows server 2012r2-24x7, my team handled submitting forms and sharing news through shared file shares that were scattered across different locations, leading to issues such as misplaced files. News was primarily shared via email, creating a chaotic environment where new employees struggled to locate necessary documents, which became streamlined once we transitioned to Sharepoint 2010 on Windows server 2012r2-24x7..”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

[Read full review](#) 

“I have been using Sharepoint 2010 on Windows server 2012r2-24x7 for about two years.

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is to store documentation, images, and marketing materials, as well as using the planner as a Scrum board.

“A specific example of how I use it for storing documentation or as a Scrum board is that the planner board we use to create stories on projects that the team will be working on, as well as assigning to individuals for specific topics that they will be handling and to be able to track the progression of where the project is. When we hold our daily stand-ups, we can go through the board quickly and everyone can discuss what is going on and if they have any hold-ups. Since we're a small company, we did not want to invest in a Jira board, and the planner board works out perfectly for us since we also use Sharepoint 2010 on Windows server 2012r2-24x7 to store all of our documentations and organize our marketing materials and images..”

Kristine Parrinelli

Agile Solutions Designer at a tech consulting company with 51-200 employees

[Read full review](#) 

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is updating a company intranet, and I have been using Sharepoint for many companies. I worked in a banking company, a healthcare company, a manufacturing company, and for all of those I used Sharepoint 2010 on Windows server 2012r2-24x7 as a company intranet page. That page consists of many organizational charts.

“I use Sharepoint 2010 on Windows server 2012r2-24x7 specifically for a long-term project where I need to assess the list and the document library. There is one project, a big SAP-related project, where we have multiple timelines: the initiation, requirement gathering, development, UAT, and go live. We have collected a document library for each folder and then added whatever the file update, UAT script, or everything, serving as a repository. We have created a status and multiple metadata, including a status report or whose assignment it is, who is working on it, and how much it is completed, along with red, green, and blue buttons. Basically, that is one thing where I use Sharepoint 2010 on Windows server 2012r2-24x7 as a repository.

“I have created a support website for Sharepoint 2010 on Windows server 2012r2-24x7. This website primarily serves as a Sharepoint support hub, where I created a form for enhancement, bug fix, update, or issue. This is sent to the entire company, and the entire company uses that form. We use that log report and have weekly meetings on top of that to discuss how much work is in our queue and how much work is done. We then send a weekly report to our management about what has been achieved and what is in the pipeline. So, that was one of the very interesting projects I have created on Sharepoint 2010 on Windows server 2012r2-24x7..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

Customer Service and Support

“Customer support has not been extensively used by me, but I do know a go-to person for assistance. Sharepoint 2010 on Windows server 2012r2-24x7 is in an end-of-support era, so there is very limited customer support available..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

[Read full review](#) 

“The customer support for Sharepoint 2010 on Windows server 2012r2-24x7 has been great; it has been a positive experience. I would rate the customer support for Sharepoint 2010 on Windows server 2012r2-24x7 an eight out of ten..”

Validated user

Business Analyst, Product Owner at a non-profit with 10,001+ employees

[Read full review](#) 

“I personally did not have to reach out to customer support for Sharepoint 2010 on Windows server 2012r2-24x7, but I know some of my colleagues did. I am aware there were some frustrations, but overall, I think it was very satisfactory. They got good results and everything is working, so it turned out okay..”

Cliff Osborne

Application Developer at El Camino Hospital

[Read full review](#) 

“Sharepoint 2010 on Windows server 2012r2-24x7 has great customer support. They respond on time and send every necessary detail you need. Any question you ask, they are always there to help you. It is fantastic, and I give them a ten out of ten.

“I rate the customer support for Sharepoint 2010 on Windows server 2012r2-24x7 a ten. They are good and very good..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“Customer support can sometimes involve long phone calls on hold if you call in directly. It would be beneficial if there was an AI option where you can get in contact with somebody much quicker instead of having to call.

“I would rate customer support a seven, as once you finally speak to somebody, they are very knowledgeable and capable of helping you resolve the issue. However, the wait time to actually talk to someone is not that great..”

Kristine Parrinelli

Agile Solutions Designer at a tech consulting company with 51-200 employees

[Read full review](#) 

Other Advice

“For others looking into using Sharepoint 2010 on Windows server 2012r2-24x7, I think it is a wonderful tool for a small team just starting in a startup, as well as for a large team, since there are many documentations that companies have. Sharepoint 2010 on Windows server 2012r2-24x7 helps organize them in a way that suits your needs and your company's needs. Additionally, there are other features if you do not want to buy additional applications that you can use similarly in Sharepoint 2010 on Windows server 2012r2-24x7, which is how we found the planner. I would rate this product a nine overall..”

Kristine Parrinelli

Agile Solutions Designer at a tech consulting company with 51-200 employees

[Read full review](#) 

“We experienced a learning curve as we had little prior experience with Sharepoint 2010 on Windows server 2012r2-24x7, except for simple file repository use, which made managing permissions and creating a more attractive Sharepoint page a bit challenging for us.

“My advice for others considering Sharepoint 2010 on Windows server 2012r2-24x7 is to assess whether they will connect their machine to the internet, as it is no longer supported and lacks security patches. If they already have the necessary hardware and licenses and prefer to avoid subscription fees, it is still a stable solution with plenty of resources available.

“I would rate this product an eight overall..”

davidmwilliams

CIO / CTO / Head Of Data at Data Excellence

[Read full review](#) 

“[Governance](#) and security in Sharepoint 2010 on Windows server 2012r2-24x7 are similar to those in other Sharepoint versions.

“If your company is mid-sized or small and does not require complicated data management, Sharepoint 2010 on Windows server 2012r2-24x7 could be a way to go.

“I would not put much pressure on recommending Sharepoint 2010 on Windows server 2012r2-24x7 to a company, considering cloud-based alternatives with better features. While security and other aspects do not present issues, the better alternatives in the market should be considered. If you are currently using it, continue using it, but you do not need to go ahead and buy a new one. I gave this review a rating of seven out of ten..”

Ruchi Jain

Senior Business Analyst at a construction company with 51-200 employees

[Read full review](#) 

“Sharepoint 2010 on Windows server 2012r2-24x7 is one of the best, and I give it an eight on a scale of one to ten, which represents my overall rating for this product.

“Regarding Sharepoint 2010 on Windows server 2012r2-24x7's AI capabilities, it is awesome. It protects data very well, and I do not have any issue with that. Sharepoint is really trusted.

“Regarding Sharepoint 2010 on Windows server 2012r2-24x7's AI capabilities, it provides a very good response, and its level of accuracy is actually good. I could rate that on a nine.

“Please use Sharepoint 2010 on Windows server 2012r2-24x7. It is going to make your work good. It is going to make everything look easier, faster, and better. It will save your cost, arrange your files, and connect your staff and your client, everything all in one. It is good, and you can use it..”

Balogun Peter

Digital Magazine Manager at OMC System

[Read full review](#) 

“On a scale of one to ten, I would rate Sharepoint 2010 on Windows server 2012r2-24x7 a nine.

“I chose nine out of ten for Sharepoint 2010 on Windows server 2012r2-24x7 because it is good software and it is reliable, robust, and scalable.

“Regarding Sharepoint 2010 on Windows server 2012r2-24x7's governance and security, I think they are good and on par with other software.

“Regarding Sharepoint 2010 on Windows server 2012r2-24x7's accuracy and reliability of output, I find it to be accurate and reliable.

“My advice to others looking into using Sharepoint 2010 on Windows server 2012r2-24x7 is that if you are looking for a hassle-free implementation, go for it.

“My overall review rating for Sharepoint 2010 on Windows server 2012r2-24x7 is nine out of ten..”

Rajkumar Gupta

Manager, Ibms Projects Operations & Corporate Information Technology at
Yotta Infrastructure Solutions LLP

[Read full review](#) 

“I developed this application with API. I use Sharepoint API to create this application. I created an executable file that the IT user can run and check the permissions.

“I give the advice to ensure and give a stable Sharepoint 2010 on Windows server 2012r2-24x7.

“I have not used the AI capabilities of Sharepoint 2010 on Windows server 2012r2-24x7 because I did not need this feature. If it works, my installation does not have AI features because I used it five or three years ago.

“In my project, I do not use AI functionalities of Sharepoint 2010 on Windows server 2012r2-24x7. I do not know if it is available.

“I work in the office with Sharepoint 2010 on Windows server 2012r2-24x7. I do not work in the office that handles the provisioning of the server and the installation. I only use the installation as a user, which my IT department set up.

“I have given this product a review rating of eight..”
