Product Recap

Windows Server 2022 (Windows Server 2022) | Support
by SupportedImages

Windows Server 2022 (Windows Server 2022) | Support by SupportedImages Recap

Windows Server 2022 (Windows Server 2022) | Support by SupportedImages integrates advanced security and Microsoft Azure integration, making it a robust server management platform tailored for demanding business environments.

Windows Server 2022 addresses enterprise needs with hybrid capabilities, improved security protocols, and seamless cloud integration. It empowers IT departments with improved connectivity and efficiency by offering robust tools and solutions designed for versatile deployments across network infrastructures. Enhanced by Azure support, it provides operational versatility and scalability.

What are the key features of Windows Server 2022?

- **Advanced Security:** Features like secured-core server and secured connectivity to protect data and infrastructure.
- **Azure Integration:** Provides seamless hybrid capabilities with Azure Arc, enabling hybrid cloud strategies.
- **Improved Container Support:** Enhancements that reduce image size, resulting in faster downloads and increased efficiency.
- **Storage Enhancements:** Offers scalable storage solutions with Storage Migration Service and improvements in Storage Spaces Direct.

What benefits and ROI can users expect?

- **Improved Security:** Reduces vulnerabilities and potential breaches, protecting critical business data.
- **Increased Efficiency:** Streamlines operations, decreasing downtime and enhancing productivity.
- **Scalability:** Supports business growth with flexible and scalable infrastructure.

Windows Server 2022 is particularly beneficial for industries like healthcare, finance, and retail, where operational stability and data protection are crucial. The platform's advanced security and hybrid cloud capabilities also make it ideal for enterprises needing reliable, scalable solutions that integrate seamlessly with cloud environments while ensuring compliance and robust data security.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“I see savings in time and money with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages.”

Noor Parkar

Infrastructure Administrator at a marketing services firm with 10,001+ employees

“Simplicity and user graphical interfaces represent the best aspects that I found in Windows Server 2022 (Windows Server 2022) | Support by SupportedImages.”

Nino Stepančić

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

“The installation of Windows Server 2022 (Windows Server 2022) | Support by SupportedImages is very easy.”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

“The biggest advantage of Windows Server for me is that it is more secure and adds security complexity to the environment.”

Ahmed Saad

CIO at a financial services firm with 1,001-5,000 employees

What users had to say about valuable features:

“The biggest advantage I see is that you have a vision for all the administration tools, and if you want to create a group policy, it's very easy to do. You can find all that you need without needing to use the command line to create any security policy.

“Microsoft is working fine these days. They used to have many security gaps in their versions, but I think they have minimized the risks with any new version they implement. For a while now, all security patches and fixes are already deployed within a gap time, which I am satisfied with..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

“From my experience with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages, the biggest advantage I find is that every new release has a new enhancement, which is what I prefer. Regarding valuable features of Windows Server 2022 (Windows Server 2022) | Support by SupportedImages, the addition of roles and features, along with automation, is what I appreciate more about the product.

“I see savings in time and money with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages. There are most of the UI tools that I am comfortable with, along with a graphical user interface that makes administration easier and control simpler. I save on time with all of these aspects. I quantify the savings at about 20%..”

Noor Parkar

Infrastructure Administrator at a marketing services firm with 10,001+ employees

[Read full review](#) 

“The biggest advantage of Windows Server for me is that it is more secure and adds security complexity to the environment. One of the features I appreciate is that it is supported by Microsoft.

“I value its capabilities, particularly its scalability with the environment.

“I work integrating Microsoft Defender for Endpoint with Windows Server and the DLP endpoint. This integration is helpful because Security Defender, Windows, and the firewall defender work integrated with the DLP to block incorrect information from being unauthorized.

“Multi-layered security is effective. Hardware root-of-trust and firmware protection secure data integrity from unauthorized access or unauthorized change..”

Ahmed Saad

CIO at a financial services firm with 1,001-5,000 employees

[Read full review](#) 

“Simplicity and user graphical interfaces represent the best aspects that I found in Windows Server 2022 (Windows Server 2022) | Support by SupportedImages.

“Versatility is one of the main features of Windows Server 2022 (Windows Server 2022) | Support by SupportedImages.

“We started testing approximately a year ago, but we have not seen a significant breakthrough with using this particular feature. It is an interesting feature but nothing more than that.

“Native security applications in Windows Server 2022 (Windows Server 2022) | Support by SupportedImages integrated quite nicely. When you have a native security application in Windows Server 2022 (Windows Server 2022) | Support by SupportedImages, it consumes fewer resources and does not strain PCs as much as third-party vendors could, which can be quite a burden for computers. Overall, I would say it is an acceptable solution. I would not say it is the best, but it is not the worst..”

Nino Stepančić

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

[Read full review](#) 

Other Solutions Considered

“I would say Windows Server 2022 (Windows Server 2022) | Support by SupportedImages is equal to Red Hat Linux at the moment, as both have enhancements. I am using Red Hat Linux also..”

Noor Parkar

Infrastructure Administrator at a marketing services firm with 10,001+ employees

[Read full review](#) 

“I would say Linux is more stable than Microsoft. I cannot say that Microsoft is the best for granted because there are other operating systems, like Linux, which are stable and fit for business. Earlier, there were Unix systems, and in Linux, there are different versions that can fit my business, but often open-source versions are not recommended. The paid versions are already stable and nice..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

[Read full review](#) 

“In this regard, I would prefer Microsoft.

“Linux is complex to handle and requires more people and more expertise. Much more expertise is required for Linux. Documentation and educational resources for Linux are much harder to find than they are for Microsoft technologies..”

Nino Stepančić

[Read full review](#) 

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

“I have not used anything similar to Windows Server from a different vendor. I have reviewed Linux and AIX.

“I prefer Windows Server more when I compare it with Linux. From my point of view, Windows is better because it is much easier to get the security configuration and security parameters..”

Ahmed Saad

ROI

Real user quotes about their ROI:

“The example of ROI I see is best availability and continuity without interruption. I see an ROI from stability and integration, as there are returns on my investment in Microsoft..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

[Read full review](#) 

“We can see a return on investment, but overall, if you are a company like ours, which is not an IT company, this is basically an expense of the company and it is quite difficult to see the return on investment in this regard.

“It is quite difficult to track. If we compare it to Linux machines, it is probably easier to handle and easier to manage. You have many more personnel that can work with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages because it is much harder, at least in Croatia, to find people that are skilled in using Linux. In that regard, it is much easier and cheaper to run Windows Server 2022 (Windows Server 2022) | Support by SupportedImages in terms of labor cost..”

Nino Stepančić

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

[Read full review](#) 

Use Case

“My biggest and major use case for using Windows Server 2022 (Windows Server 2022) | Support by SupportedImages is mainly as a domain controller and a platform for ERPs that use SQL..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

[Read full review](#) 

“For all of my applications, I use Windows Server 2022 (Windows Server 2022) | Support by SupportedImages for the major purposes. My major use case for Windows Server 2022 (Windows Server 2022) | Support by SupportedImages includes SQL, SharePoint, Exchange, and everything else mentioned..”

Noor Parkar

Infrastructure Administrator at a marketing services firm with 10,001+ employees

[Read full review](#) 

“Windows Server 2022 (Windows Server 2022) | Support by SupportedImages serves as an operating system for hosting applications, databases, and similar infrastructure. For the purpose of hybrid cloud integration, we are using Azure Arc. We operate in a hybrid environment, with most infrastructure on-premises, but we maintain some parts in Azure and another infrastructure as a service in one of our markets..”

Nino Stepančić

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

[Read full review](#) 

Customer Service and Support

“Customer service really depends on the problem that you have. In some cases, it was very quick and they were really helpful. In some cases, it was not resolved for weeks. I would rate customer service at seven or eight out of ten..”

Nino Stepančić

[Read full review](#) 

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

“I do appreciate the technical support from Microsoft. I would rate support from Microsoft at seven points out of 10. I believe there is room for improvement in the support side as it has slow response times. It should involve more proactive effort to resolve the problems, which is currently lacking..”

Noor Parkar

[Read full review](#) 

Infrastructure Administrator at a marketing services firm with 10,001+ employees

“Microsoft needs to act faster. They have to merge the level of support to solve problems at once. I don't need to wait two to three days, or sometimes two to three weeks collecting logs. After two weeks, they're telling us they're going to escalate to the next level, which is not good for business..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

[Read full review](#) 

Other Advice

“I am still using Microsoft solutions. I am not using [Azure Arc](#) in Windows Server. I have never purchased any solutions from [AWS Marketplace](#). I would rate scalability as nine. I would rate stability as nine as well. I give this review an overall rating of nine..”

Ahmed Saad

CIO at a financial services firm with 1,001-5,000 employees

[Read full review](#) 

“I currently work with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages as a customer.

“We use [AWS](#) but for other purposes, not for infrastructure.

“My overall rating for Windows Server 2022 (Windows Server 2022) | Support by SupportedImages is eight out of ten..”

Nino Stepančić

Head Of Infrastructure ICT support at a pharma/biotech company with 501-1,000 employees

[Read full review](#) 

“Regarding hardware root of trust and firmware protection, I assess that it does impact my data integrity. I see some benefit for that data integrity protection. I think Microsoft can improve AI in the future for integrations with Windows Server 2022 (Windows Server 2022) | Support by SupportedImages. I am integrating Windows Server 2022 (Windows Server 2022) | Support by SupportedImages with [Azure Arc](#). I'm using the Windows platform in [Azure](#), but it's not for hybrid cloud

integration. I see the benefit from those tools, and I'm satisfied. I used to use Windows NT as a mail server back in 1996. My overall rating for this product is 7 out of 10..”

Nehad ElKordy

Head of Information Technology at Rashideen Egypt For Trade

[Read full review](#) 

“The multi-layered security in Windows Server 2022 (Windows Server 2022) | Support by SupportedImages is important to me. Day by day, there should be improvement, and it is improved, as security is a must in my organization. I am utilizing [Microsoft Defender for Endpoint](#). It is good for my infrastructure, though another team is handling it and I am not the owner of that application, but it has been deployed in my system.

“I definitely see an impact on data integrity from the hardware root of trust and firmware protection aspects. The firmware update always provides enhancement to the latest functionality of the product, which supports my new solutions. I always try new solutions, so I want to make sure that my systems are up to date. I am not aware much about the price of the license for Windows Server 2022 (Windows Server 2022) | Support by SupportedImages, so I cannot comment on that part.

“I rated this review with a rating of 9 out of 10..”

Noor Parkar

Infrastructure Administrator at a marketing services firm with 10,001+ employees

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
