Product Recap

Adonis Platform

Adonis Platform Recap

Adonis Platform provides a robust framework for web developers, focusing on speed, modularity, and simplicity. It effectively caters to back-end development needs, offering a comprehensive toolkit for building scalable applications.

Adonis Platform stands out for its efficient handling of modules, offering a swift and simple setup process advantageous for both startups and large enterprises. It supports TypeScript, enhancing code quality and maintainability. Its architecture facilitates seamless task integration, RESTful API development, and front-end library support. These aspects make it a versatile choice for developers seeking a streamlined workflow while ensuring high performance and reliability in their projects. Consistent updates and active community engagement bolster its array of functions.

What key features make Adonis Platform essential?

- **Modular Structure:** Facilitates easy integration and scalability
- **TypeScript Support:** Enhances readability and maintainability
- **Comprehensive CLI:** Speeds up development tasks
- **Authentication System:** Ensures robust security measures
- **Real-time Capabilities:** Implements WebSockets for dynamic applications
- **Built-in ORM:** Simplifies database interactions

What benefits or ROI should you consider?

- **Time Efficiency:** Accelerates development processes
- **Improved Code Quality:** Supports strong typing with TypeScript
- **Scalability:** Easily adapts to growing project demands
- **Community Support:** Continuous updates and active forums

In industries like e-commerce and finance, Adonis Platform is implemented to manage high-volume transactions and real-time customer interactions. Its robust API capabilities support seamless backend operations, ensuring that data integrity and speed remain uncompromised in high-stakes environments.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“I can see all the different processes from the private bank within Adonis Platform, and that is excellent.”

Claudia Chantal

Project Manager at a financial services firm with 10,001+ employees

“Adonis Platform has positively impacted my organization because, considering the region is something new, in the last few years we have had some kind of transformation.”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

“Adonis Platform has had a great impact on my organization as we are able to see end-to-end process mapping and identify areas for process improvement.”

Himanki Batra

Senior Advisor (Knowledge, Process Management & Training) at Rio Tinto Alcan

“Adonis Platform has positively impacted my organization by enabling us to connect processes with swim lanes, clearly defining roles, the systems used in the process, and the risks involved.”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

“Recently, I worked on invoice processing in accounts payable where analysis showed the process took 42 minutes, and through optimization efforts, we reduced it to approximately four minutes, achieving significant time reduction and cost savings.”

Shiwali Mishra

Senior Specialist In Business Process Modeling at a real estate/law firm with 10,001+ employees

What users had to say about valuable features:

The best features Adonis Platform offers include the visibility of detailed process maps and the automatic saving functionality without requiring manual saves.

Himanki Batra

Senior Advisor (Knowledge, Process Management & Training) at Rio Tinto Alcan

“Once you understand how it works, you can really use it to get all your processes into Adonis Platform flows. I really like the release versions because you can create new versions and check your older versions and jump between the different versions. I also appreciate that everybody has access to Adonis Platform in our bank. We have around 93,000 employees, and everybody can access something that I released in the bank for the bank.

“From a general perspective, one very useful tool is the simulation within Adonis Platform. Via the simulation, you can simulate different kinds of processes with different attributes. I think this is a very useful feature and it is very well used in the bank. My impression is that it is helping a lot..”

Claudia Chantal

Project Manager at a financial services firm with 10,001+ employees

“Process modeling stands out to me as something I find helpful. Process modeling is valuable for me because it is very important to have all processes mapped, documented, and approved by the process owner, which helps us understand processes better on a regional level.

“Adonis Platform has positively impacted my organization because, considering the region is something new, in the last few years we have had some kind of transformation. This platform has been very useful for us not just for process documenting but also to prepare the organizational structure, one regional and six local, to understand the structure much better. We have defined all process owners; again, we have six countries but one process owner per each process, which must be someone on regional B minus 1 function. In the end, we have prepared a lot of regional processes which helped us understand each process on a regional level, including all local specifics such as legal specifics or market specifics. All of this has been very useful for us as a region..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

[Read full review](#) 

“Adonis Platform is a BPMN tool used for process modeling. We use it to model processes, add user tasks, specify task types, include systems, and validate compliance with BPMN standards. We then check with stakeholders to identify pain points and AI opportunities.

“The most valuable feature Adonis Platform offers is the validation of processes according to BPMN standards, which is the primary benefit for my work. The BPMN validation feature makes my work easier by clearly showing where errors, bugs, and issues occur, allowing us to analyze and address them.

“Adonis Platform has positively impacted my organization by providing a graphical representation of process modeling. This allows us to analyze how our processes work step-by-step with end-to-end visibility. When we showcase the process map to stakeholders, they can easily identify pain points, bottlenecks, and AI opportunities. This provides a valuable learning perspective and is informative and helpful at our current stage..”

Shiwali Mishra

Senior Specialist In Business Process Modeling at a real estate/law firm with 10,001+ employees

“Some of the best features Adonis Platform offers include the ability to map the process.

What makes the process mapping feature of Adonis Platform stand out for me is the interface provided, which makes it easy to select all the available connectors. It serves as a business process management platform, focusing on process modeling. We explored optimization, and the BPMN process diagrams created were quite easy, thanks to the natural language descriptions available and existing templates we could use immediately without starting from scratch.

Regarding other features of Adonis Platform, it also has strong capabilities in process modeling and optimization. Although I did not tap into the automation part, the BPMN process diagrams were very useful because of the existing SOP documents we could use as templates, which helped us refine and improve the process models. While using the traditional method of MS Visio, we did not have suggestions, but with Adonis Platform, it helped us refine and improve our process models, making documentation faster, even for those who are not experts in process mapping.

Adonis Platform has positively impacted my organization by enabling us to connect processes with swim lanes, clearly defining roles, the systems used in the process, and the risks involved. It also helped us map them to existing KPIs, resulting in a central repository instead of having process maps in various locations, making retrieval difficult for people. The central repository was useful as an enterprise-wide application that everyone could use and access process maps easily. Additionally, the dashboards provided in Adonis Platform helped us identify bottlenecks and inefficiencies in the processes..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

Other Solutions Considered

“Previously, we used MS Visio for traditional process mapping, and we switched to Adonis Platform due to the potential savings in terms of FTE, time, and better process mapping solutions..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

“We probably did evaluate other options before choosing Adonis Platform, but I do not know. Considering I have been here for more than three years and we have been using Adonis Platform for probably five, seven, maybe ten or more years, this was not my decision; that decision was made by our colleagues from the group..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

ROI

Real user quotes about their ROI:

“We have seen a return on investment, primarily through time saved. This initiative to standardize processes globally meant we could avoid hiring two additional employees for process mapping, which we initially thought necessary..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

[Read full review](#) 

“Using Adonis Platform has saved our time; this platform is very useful for us. However, considering I do not know our costs for Adonis Platform, I cannot answer about the correlation between costs and everything we obtain from Adonis Platform, so I cannot talk about this investment..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

[Read full review](#) 

Use Case

“Adonis Platform's main use case is to produce models or objects for different projects. For example, I built some flows for operations where I used Adonis Platform to produce models or objects. We have many different workflows with Adonis Platform, and we work with many different projects for operations. The requirements keep changing regarding what we have to do..”

Claudia Chantal

[Read full review](#) 

Project Manager at a financial services firm with 10,001+ employees

My main use case for Adonis Platform is handling admin administration and user management along with process modeling.

In user management, I provide access to users with modeler, reviewer, and viewer access levels. In process modeling, I draft process maps in a BPM environment. .”

Himanki Batra

[Read full review](#) 

Senior Advisor (Knowledge, Process Management & Training) at Rio Tinto Alcan

“My main use case for Adonis Platform is documenting processes. Specifically, we use the process landscape map where we have all processes; we create a new model, map the new model in the process landscape map, add the process owner and process manager, include all steps for the process, and send the process for approval to the process owner.

“It is important for my team to have all those processes mapped and approved in Adonis Platform because we are the region with six different markets, and we need to prepare one regional process that must be harmonized and documented. When we document all processes, we need approval from the process owner, who again is one person for all six countries..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

[Read full review](#) 

“My main use case for Adonis Platform is generating insights from the platform and analyzing processes to identify bottlenecks and pain points. This allows us to set up calls with leads appropriately and work on AI opportunities with stakeholder support.

“Recently, I worked on invoice processing in accounts payable where analysis showed the process took 42 minutes. Through optimization efforts, we reduced it to approximately four minutes, achieving significant time reduction and cost savings.

“Process modeling with stakeholder input saves considerable time. Stakeholders provide information about the systems in use and current timelines, which allows us to set up meetings to identify pain points and AI opportunities. We discuss how processes can be optimized through cost savings, timing reduction, and FTE optimization with AI capabilities. These are the outcomes we measure using established KPIs..”

Shiwali Mishra

Senior Specialist In Business Process Modeling at a real estate/law firm with 10,001+ employees

[Read full review](#) 

“My main use case for Adonis Platform is that we were traditionally using MS Visio to create process maps, and one of the projects that we had is to standardize the processes globally. We got this platform to help us map the processes and see how we can have streamlined processes that are standardized.

A specific example of a process I mapped using Adonis Platform is from a customer care environment, where we mapped the process right from the customer calling us with a problem with their equipment until we provide support through either hotline support, an in-house repair, or field service support. These are three use case scenarios that we mapped using Adonis Platform; it's three different maps created from the customer call until the customer's issue is resolved.

In my main use case with Adonis Platform, we got stuck at one point where we had to make a decision, and the options provided in Adonis Platform were quite useful because they helped us map parallel processes using the decision box provided, which allowed us to streamline that process into multiple layers..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“Adonis Platform was set up long before I joined the team. I believe it was set up in 2011, so I do not know how it was set up. I know that the licenses for Adonis Platform have to be renewed every year, and there is always a discussion about the price and about what they can do. However, I am not that involved..”

Claudia Chantal

[Read full review](#) 

Project Manager at a financial services firm with 10,001+ employees

My experience with pricing, setup cost, and licensing is that the pricing and setup cost are high, while the licensing is acceptable.

Adonis Platform was previously evaluated before I chose it. .”

Himanki Batra

[Read full review](#) 

Senior Advisor (Knowledge, Process Management & Training) at Rio Tinto Alcan

“Regarding how Adonis Platform is deployed in my organization, it is a really hard question. I do not know the specifics; we are part of a group, and our colleagues from this group are responsible for everything and are in daily contact with all stakeholders from Adonis Platform or BOC. I do not know how it works. What I can answer is that I access this platform via the web and use it on the web, without an application or cloud folder; so I really do not know how to answer this question..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

[Read full review](#) 

Customer Service and Support

“I do not remember reaching out to customer support for Adonis Platform. Since I did not reach out to customer support, I did not have any interaction with them..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

[Read full review](#) 

“I interact very often with the support team for Adonis Platform, and they are really fine and really very useful. Based on my personal knowledge of the support staff and their helpfulness, I would give Adonis Platform a rating of 10 for customer support..”

Claudia Chantal

Project Manager at a financial services firm with 10,001+ employees

[Read full review](#) 

Other Advice

“My advice for others looking into using Adonis Platform is that it is very useful and easy to use. It has a lot of functions that can be beneficial for each company. I do not have experience with other platforms, so I cannot compare it, but for me, this one is fully fine. I would rate Adonis Platform an eight out of ten..”

Nela Muslim

Process management expert at a insurance company with 10,001+ employees

[Read full review](#) 

Regarding Adonis Platform's AI capabilities, I am uncertain about its governance and security.

Regarding Adonis Platform's AI capabilities, I am not sure about the accuracy and reliability of the output since I have not used it.

“My review rating for Adonis Platform is 8. .”

Himanki Batra

Senior Advisor (Knowledge, Process Management & Training) at Rio Tinto Alcan

[Read full review](#) 

“In my experience, Adonis Platform really helps with output; when we map the processes, the output we see is easily replicable, and we can apply it to our processes to see how it is working.

I would advise others considering Adonis Platform that it is an excellent tool for process mapping, offering a smooth way of building processes and a variety of

types for mapping, including standalone processes and swim lanes. I recommend Adonis Platform for anyone aiming to standardize their processes.

Additional improvements could include a compliance feature to indicate how compliance is managed based on processes mapped in Adonis Platform and how end-users are utilizing them. I have given this review a rating of eight out of ten..”

Joseph Katuri

Founder & Lead Consultant at Erfolvia Consulting

[Read full review](#) 

“We still do not use AI capabilities for Adonis Platform, so I cannot speak to that. I know that the vendor is already using AI capabilities for Adonis Platform, but I do not think we are going to implement it.

“We still use Adonis Platform in private cloud, but we are moving to a public cloud with restrictions. I do not know exactly what kind of restrictions there are, but I know that IT is moving it. I believe we are moving to Google for the public cloud, but I do not know exactly where we came from for the private cloud.

“For anyone looking into using Adonis Platform, I would advise you to have a really good look into an organization that already uses Adonis Platform to get a feeling for whether it is what you really need. I gave Adonis Platform an overall rating of 8..”

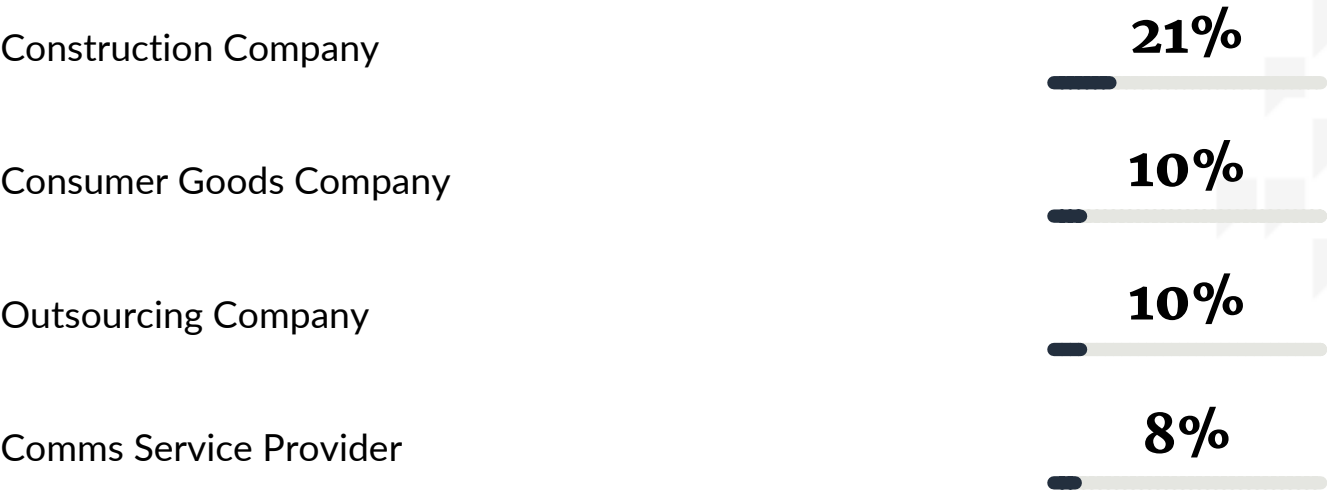

Claudia Chantal

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
