Product Recap

Udemy Business

Udemy Business Recap

Udemy Business offers a dynamic learning platform with a wide range of courses designed for skill enhancement and training across industries.

With global instructor access, Udemy Business provides region-based instruction and up-to-date content. It supports on-demand training and cross-functional skills development, supplemented by practical projects and a mobile app for ease of use. Integration with HR tools streamlines onboarding and upskilling, while robust security compliance and real-world labs enhance user confidence.

What are the key features of Udemy Business?

- **Broad Course Selection:** Extensive library covering diverse topics for comprehensive learning.
- **Global Instructor Access:** Learn from industry experts worldwide.
- **Regular Content Updates:** Stay current with evolving trends and skills.
- **On-Demand Training:** Flexible learning schedules.
- **Practical Projects:** Hands-on experience with real-world applications.
- **Mobile App:** Learn on the go with convenience and flexibility.
- **Security Compliance:** Ensures data protection and integrity.
- **Custom Learning Paths:** Tailored content to meet organizational goals.
- **HR Tool Integration:** Seamless integration aids efficient onboarding.

What benefits should users expect from Udemy Business?

- **Skill Enhancement:** Accelerated upskilling through diverse courses.
- **Cost Efficiency:** Affordable training solutions for teams.
- **Flexible Learning:** Adaptable to different learning styles and paces.
- **Confidence Boost:** Real-world labs provide practical experience.

Organizations across industries adopt Udemy Business for training on platforms like Oracle, AWS, and Azure. Teams in advisory and technical roles engage with it for business planning, cybersecurity, and skill development. It facilitates custom learning paths tailored across departments, providing resources in both technical and general skill areas.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“Udemy Business has positively impacted my organization by significantly improving productivity and skill development.”

Pranay Jain

Senior software engineer at Simplify vms

“Udemy Business has positively impacted my organization by providing the ability for everyone to get to the same level that the company expects.”

Ikozić Cossage

Software Engineer at a computer software company with 1,001-5,000 employees

“The best feature Udemy Business offers is the comprehensive course selection.”

Validated user

Manager, Production Services at a tech services company with 51-200 employees

“The most valuable aspect is the hands-on experience it provides with labs, allowing real-world application and understanding of concepts beyond just theoretical knowledge.”

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

“The main advantage of Udemy Business is its region-based learning. For example, if a learner from India wants to learn technology, they can find instructors from India who understand their learning style and thought process. This makes learning easier and more relatable. Additionally, Udemy Business is a global platform, so learners can access courses from instructors worldwide. A person from the USA or someone with a higher skill set can create videos. Another advantage is the range of available courses, with no limitations on what you can learn. You can get the right content for the specific technology.”

Divya Prakash

Technical Architect at Hexaware Technologies Limited

“The solution enables us to train our users.”

Eric Ha

Solutions Development Manager at Kyocera International

“The tool's most valuable feature is its cloud computing content. While Udemy Business offers training and knowledge across various areas, I use it for cloud computing technologies. Many videos and tutorials are available on this topic, which benefits me.”

GurpreetSingh4

Manager at Accenture company

What users had to say about valuable features:

“Udemy provides the opportunity for hands-on experiences. There are labs available for users to run so that they can experience the real thing, not just the theory. This allows them to encounter real-life situations and learn how to handle them effectively..”

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

[Read full review](#)

“The solution allows us to look at training at any time at our convenience. It has a mobile app, which we can easily access to take notes.

We have 24 hours of learning..”

Manjunath Bhimareddy

Project Lead Performance Engineer & Automation at Allstate

[Read full review](#) 

“The best feature Udemy Business offers is the comprehensive course selection. When I say comprehensive course selection, I don't have a particular area or type of content that stands out to me, but in general, whenever I need to look for something, I can usually find it..”

Validated user

Manager, Production Services at a tech services company with 51-200 employees

[Read full review](#) 

“The tool's most valuable feature is its cloud computing content. While Udemy Business offers training and knowledge across various areas, I use it for cloud computing technologies. Many videos and tutorials are available on this topic, which benefits me.

It provides assessments after courses and links to additional resources for areas where improvement is needed. I appreciate that once you purchase a course, it remains available forever, allowing you to revisit it whenever you have free time.

The GUI is nice, with videos and content on the right side and comments at the bottom. I haven't encountered any challenges with the user interface. The course quality is also good, and the platform is easy to navigate.

The benefit of using Udemy Business is that you can learn about new technologies. Sometimes, vendor-specific documentation can be lengthy and challenging to understand. Udemy Business courses condense this information into two- to three-hour sessions focusing on the most important topics and key points. This approach helps you remember and enhance your knowledge..”

GurpreetSingh4

Manager at Accenture company

[Read full review](#) 

“The best features Udemy Business offers are a wide range of different learning platforms for the topics that can be searched on, and especially for all levels of knowledge, from the beginners' basic content to some specific topics.

The variety of topics and levels has helped me greatly. When I'm new to a topic, I always search for basics and beginner content, and for more experienced topics, I use specific narrow courses, such as embedded Linux using Yocto, because I was already familiar with embedded Linux and Ubuntu, but I had never worked with Yocto specifically. This was an amazing opportunity for me to learn about Yocto.

Udemy Business has positively impacted my organization by providing the ability for everyone to get to the same level that the company expects. It is not team-specific; rather, it provides a person-to-person ability to search and deliver something that each person needs that is specific for them.

Faster onboarding is the most evident benefit. The knowledge gained through Udemy Business allows certain people to reach the needed level, and in my example, I noticed that I got a faster introduction to topics specific to the field that the company works on..”

Ikozić Cossage

Software Engineer at a computer software company with 1,001-5,000 employees

[Read full review](#) 

“Udemy Business offers multiple features such as tracking how many lessons you have completed and whether you have given the required assessments. It divides the content into modules which is very beneficial, and after each module, there is an assessment that checks your understanding of the topic, making your understanding clearer, better, and more functional.

“When I was learning, particularly in the large Angular course, each module would have questions related to it, asking how a component is created or what the shortcut commands are. These concepts are initially difficult to remember, but when I started giving exams, I began to reconcile that information, leading to better retention and understanding as I worked in an enterprise culture.

“Udemy Business has positively impacted my organization by significantly improving productivity and skill development. If individuals learn from scattered platforms like YouTube, the content is spread out, requiring them to watch videos from multiple creators. In contrast, Udemy Business provides modular courses that offer a clearer understanding.

“The onboarding process has improved because previously people were gathering information from various platforms, but after using Udemy Business, we provided new hires with a course. They complete it, do the assessment, and acquire about ninety percent of the technical knowledge they need easily, allowing them to ask questions and clarify doubts with seniors afterwards.

“I have learned a variety of valuable skills and certifications from Udemy Business, including Docker, Angular by Maximilian, SAP-related courses, React by Hitesh Choudhary, Kubernetes, and full-stack development by Angela Yu, among others.

“There is a structured process for ongoing skill development and upskilling, where technical seniors identify the best courses based on team needs, such as transitioning to React Native, allowing for efficient training plans that suit our organization.

“The AI capability of Udemy Business is very good, and its governance is strong as it tracks user engagement with the modules, checking if users complete them in time without skipping lectures.

“The reliability and accuracy of output from Udemy Business are very great, at one hundred percent. The platform consistently provides perfect responses, eliminating the need for extensive searches for desired content, and the courses are frequently updated by their creators..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

Other Solutions Considered

“Before Udemy Business, we focused on content creation platforms including Coursera and YouTube, but after adopting Udemy Business, we aligned our efforts solely with it for better consistency..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

“In my current organization, users mainly use Code Cloud, LinkedIn Learning, and Microsoft's learning platform due to our focus on Azure. Prior to joining my current workplace, I used Udemy since it was less expensive and provided a variety of courses..”

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

[Read full review](#) 

“I've used multiple learning portals before. What I appreciate about Udemy Business is that there are no monthly charges. You can even try a trial class before deciding to purchase the full course..”

GurpreetSingh4

Manager at Accenture company

ROI

Real user quotes about their ROI:

“The return on investment is quite good because you save time and have an organized learning experience. Compared to learning on your own, which can take a lot of time, this platform offers quick and effective learning, making it convenient for businesses..”

Dimitris Iracleous

Lead Technical Instructor at Code.Hub

[Read full review](#) 

“Udemy enriches users’ knowledge and improves their careers. Udemy is a good choice for technical transformations. It is like a virtual college. We can see how many people have subscribed to a particular course..”

MohanrajV

Tools manager at Harmony international

[Read full review](#) 

“I have definitely seen a return on investment with Udemy Business, particularly since it streamlines the learning process compared to previously searching multiple content creation platforms such as YouTube. We can now select one course and receive thorough coverage of the topic..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

Use Case

“I have been using Udemy to take courses, particularly one focused on Google's programming language. Although I have not completed the course due to time constraints, I find the platform excellent for self-paced learning without the need for an instructor to be present one-on-one..”

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

[Read full review](#) 

“The tool's main purpose is to enhance learning and responsiveness across the organization. We focus on making technology learning more convenient for employees. It provides resources for learning platforms like Oracle, AWS, and Microsoft Azure. Our goal is to promote learning from anywhere..”

Divya Prakash

Technical Architect at Hexaware Technologies Limited

[Read full review](#) 

“My main use case for Udemy Business is for learning and the courses. Sometimes I use Udemy Business to learn about specific technologies or things related to game development..”

Validated user

[Read full review](#) 

Manager, Production Services at a tech services company with 51-200 employees

“I primarily use the solution for IT training across numerous categories. For instance, if I am working on certain projects where additional knowledge or skills are needed, I will use Udemy Business to join a suitable course to gain basic knowledge. I am only able to gain in-depth knowledge through hands-on experience because, just like courses on Udemy Business, I haven't come across tutorials even on other platforms that are capable of providing in-depth and practical knowledge on certain topics or skills. For instance, if a DevOps project arrives on which I will work, I use Udemy Business to brush up on my knowledge. .”

Praveen Chaudhary

[Read full review](#) 

Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

“My main use case for Udemy Business is searching for desired courses. When I have a need for new knowledge or new topics to work on, I search for them on Udemy Business, and one of the examples is embedded Linux using the Yocto project that I worked on.

Apart from manual search, I also use the learning path that is constructed by my company, and I follow the learning path to get the appropriate knowledge that the company decided is valuable..”

Ikozić Cossage

Software Engineer at a computer software company with 1,001-5,000 employees

[Read full review](#) 

“The main use case for our organization is to learn new courses, and there are some courses related to HR that we receive during onboarding. There are courses related to technical skills that we can learn through Udemy Business, so it plays a crucial role in that.

“One specific example of a course I studied through Udemy Business is a technical course on Angular by Maximilian, which is a very large course of around 300 plus hours that I used to clear my basics and develop a keen understanding of how Angular should be used in an enterprise-level platform.

“I have used Udemy Business for learning multiple HR-related videos including POSH-related videos and onboarding videos, which include the expected behavior of individuals in a company, how communication should be conducted, what things need to be learned before joining a team, how Scrum works, how standup is performed, and the different roles of users in an enterprise. For these topics, I watched multiple videos to get a keen understanding, which is great because Udemy Business provides these kinds of resources.

“Our entire HR-related structure is built upon Udemy Business, so the courses HR provides align perfectly with Udemy Business courses. For example, there are courses on onboarding and behavioral skills necessary for teamwork, which HR integrates for us to learn sequentially..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“The setup is generally straightforward. It's a platform where you can watch videos, and if you encounter any issues, you can directly contact the content creator. It is user-friendly. Some courses may offer better communication options than others..”

Dimitris Iracleous

Lead Technical Instructor at Code.Hub

[Read full review](#) 

“I believe it was very easy for users in my organization to adapt to Udemy Business, as it is an interactive and user-friendly platform. You simply type in the course you need to learn, watch the modules in order, complete the assessment, and receive certification, making it a straightforward process..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

“The web version of Udemy Business can be easily setup on smartphones. The mobile app from Udemy Business is quite straightforward and can be installed within five or ten minutes. Almost anyone can install the solution on their own, and not much maintenance is required; just some updates need to be installed from time to time. .”

Praveen Chaudhary

[Read full review](#) 

Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

“The tool's deployment is easy. It can integrated into our platform using APIs. Learning access took just a few minutes, and the implementation was completed within hours. However, the key factor is not the deployment time but how the learning portal is integrated with the organization's existing infrastructure. Integrating with Udemy Business' API is not particularly challenging; the focus lies on maintaining the organizational learning portal.

The number of people needed for deployment and maintenance depends on the project's scale and goals. Typically, a team of engineers is required to handle the deployment and ongoing maintenance of the learning portal..”

Divya Prakash

[Read full review](#) 

Technical Architect at Hexaware Technologies Limited

Customer Service and Support

“I tried contacting the solution's support team because some Rosetta Stone courses I needed were unavailable on Udemy Business. The support was not very quick, and I did not have a positive outcome in the end..”

Teodor Muraru

Developer at Emag

[Read full review](#) 

“The customer support for Udemy Business is very great, with a twenty-four seven policy ensuring replies.

“I would rate the customer support a solid ten because it is very effective..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

Other Advice

“If your company has more than fifty employees and you wish to establish a learning structure, then Udemy Business is a great platform to implement directly. I provide this review with an overall rating of nine out of ten..”

Pranay Jain

Senior software engineer at Simplify vms

[Read full review](#) 

“I don't have any advice to give to others looking into using Udemy Business. I feel pretty satisfied regarding improvements such as more advanced filtering, better progress tracking, or more interactive content. My review rating for Udemy Business is 8..”

Validated user

Manager, Production Services at a tech services company with 51-200 employees

[Read full review](#) 

“For those passionate about computing, networking, or programming, Udemy is one of the best platforms to choose. It offers affordable courses that you can take at your own pace. I did not have any issues using Udemy.

I would rate Udemy Business ten out of ten..”

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

[Read full review](#) 

“I would recommend Udemy Business because it's a perfect platform. However, it does have some shortcomings. Addressing those issues would improve the platform. Overall, it's a solid choice.

Overall, I rate the solution an eight out of ten..”

Validated user

Senior Architect at a engineering company with 10,001+ employees

[Read full review](#) 

“I would advise others looking into using Udemy Business not to be shy and not to think that something cannot be found because it contains many different topics and different video materials to cover everything. I encourage people to explore it and use it, finding something suitable for their needs.

I would rate my overall experience with Udemy Business a ten out of ten..”

Ikozić Cossage

Software Engineer at a computer software company with 1,001-5,000 employees

[Read full review](#) 

“It's a great learning tool with many videos covering the latest technologies. They often offer good discounts, making it affordable for students. However, the content sometimes remains basic and may not reach expert levels. Still, considering the price point, it's suitable for starting to learn a new technology.

It's a great platform for anyone starting to explore the latest technology. You can choose courses and receive feedback. Plus, discounts are often available, sometimes up to 90 percent off, making it affordable for youngsters.

I rate the overall product a nine out of ten..”

GurpreetSingh4

Manager at Accenture company
